Per our request, the staff visit with Framatome-ANP in Lynchburg has been moved from this Thursday, June 13 to Monday, June 17, . The purpose is to allow staff to view the cavity and provide input to the licensee's decision on how best to section (i.e., cut) the cavity bore that formally housed penetration nozzles 3 & 11.

Doug-

Monday, June 17 would work the best for getting together in Lynchburg, VA to observe and discuss the sectioning of the RPVH cavity. I know that you are out of the office today so I have cc'd the other NRC staff that plan to attend so they can add it to their calendars. On Monday, I expect to have more details to provide to you.

Also, I added Mark Kirk as a cc to let him know of this and the opportunity to participate and include Oakridge, if appropriate, with regards to discussing cavity measurements

 Subject: Fwd. Lynchburg on the 13th

Dale/Mike -

We previously agreed to have NRC staff in Lynchburg, Virginia on June 13 to observe and discuss sectioning of the RPV cavity. Per the attached email, we would like to postpone the trip to June 17 or 18 to accommodate an additional staff reviewer. Please let me know if these dates are compatible.

Thanks - Doug

Subject Lynchburg on the 13th

Doug/Allen/Bill,

To accommodate Andrea Lee's schedule, is it possible to move the trip to Lynchburg to the 17th or 18th of June? Can you all support either of those days? Can the licensee? It's important to me to have Andrea Lee be able to support this trip, if at all possible.

Thanks for your consideration,
Stephanie
