Subject: Re: EPRI NDE Field Trip

Mike,

I am interested in going, but could be pre-empted by another NEI meeting (not yet nailed down, but the same week). So, let's plan for me to go, but don't work around me (i.e., if I miss it, I miss it).

I am interested in UT POD and sizing uncertainty for real SCC cracks. (I am not impressed by capabilities demonstrated using synthetic flaws made by machining narrow notches and then squeezing them closed.)

Steve

Hello:

NRR

Frank Ammirato and I will be talking later today arrangements and agenda for a field trip to the EPRI NDE center during the week of June 24th. Both Frank and I are assuming that June 26th (all day) will be a good date for the field trip.

Please, send me an email stating if you would be interested in going on the field trip and if June 26th is a good date. If the 26th is not a good date (yes, I know about the all-employee meeting) then provide me with two other dates during the week of the 24th.

Also, include in your email reply any NDE demonstrations, mock-ups, topics, etcetera that you would like to be considered for the agenda.

I plan to finalize arrangements for this field trip by Thursday of this week, so please provide your response by COB on Wednesday.

Cordially,
Michael Marshall
