#1

I have lived in San Luis Obispo county for ten years. I live about six miles from Diablo Canyon. My concerns are threefold. I am opposed to PG-E building more storage tanks to store fuel (spent) ~~when~~ we have no idea what the long term effect of storing raditation has on people and the environment.

Concern #2: Evacuation process. I have seen the traffic jams that occur when Morro Bay holds their annual fireworks display. The

Signed: \_\_\_\_\_

- line of cars leaving the event goes on for hours. I can only imagine the mayhem in a full scale evacuation,

We live in a time where ~~terrorists~~ terrorist attacks have become a reality and we are woefully unprepared.

There are <sup>other</sup> forms of energy that can be used. The time is now to start switching over to more people and environmentally safer forms of energy.
