when Diablo was in its planning stages we were sold a beautiful picture of clean efficient ENERGY. However, we were never told about the waste or how long it would take this waste to de-toxify it is inconceivable to me that we cannot look into the not so distant future and see that the spent fuel waste will have nowhere to go. Let us care for our children and grandchildren by closing the plant and build EARTH quake proof (NOT RESISTANT) and Bomb proof storage. And use our natural resources like, wind, solar or water. For the sake of the planet I URGE you to plan this as soon as possible, THANK YOU for allowing my voice to be heard.
