SUBJECT: ERRATA SHEET FOR REGULATORY GUIDES 1.184 AND 1.185 TO REFLECT ENVIRONMENTAL IMPACT STATEMENT SUPPLEMENT

In November 2002, the Generic Environmental Impact Statement (GEIS) on Decommissioning of Nuclear Facilities (NUREG-0586) was replaced with a supplemental GEIS. The supplement was prepared to reflect technological advances in decommissioning operations, experience gained by licensees, and changes made to U.S. Nuclear Regulatory Commission regulations since the 1988 GEIS. The supplemental GEIS completely supercedes the original NUREG. A more complete discussion of the scope and methods for developing the supplemental GEIS can be found in the abstract of the final document, "Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities, Supplement 1," NUREG-0586, Supplement 1.

Your office issued two Regulatory Guides in July 2000 that contain references to the previous GEIS which should be changed to reflect the supplement. They are: (1) Decommissioning of Nuclear Power Reactors, Regulatory Guide 1.184; and (2) Standard Format and Content for Post-Shutdown Decommissioning Activities Report, Regulatory Guide 1.185. My staff has prepared errata sheets for both of the affected Regulatory Guides. Copies of the errata sheets are attached for your use in updating the GEIS reference information in the Regulatory Guides.
