March 31, 2003

Atomic Inspection Labs, Inc.
ATTN: Klay L. Roberts
Radiation Safety Officer
5620 Modesto N.E., Suite A
Albuquerque, NM 87113

SUBJECT: INITIAL NRC FORM 241 FOR CALENDAR YEAR 2003

Mr. Roberts:

This acknowledges receipt of your initial NRC Form 241 dated March 28, 2003, and the \$1400 application fee, submitted to the NRC Region IV office to report proposed activities in NRC jurisdiction under the authority of the general license pursuant to 10 CFR 150.20.

Your Agreement State license is recognized as valid for the use of licensed material for industrial radiography at the locations listed on your NRC Form 241, and attachments, if any. Please be aware that working under reciprocity in NRC jurisdiction requires you to comply with NRC regulations, as described in 10 CFR 150.20.

The calendar year 2003 RTS Reference numbers for your some of your proposed locations of work are as follows. When you are transporting radioactive material across exclusive Federal jurisdiction, you do not have to request reciprocity for that activity. For example, if you are working at Sandia National Labs, you will have to request reciprocity and notify this office of the dates and location(s) of work. You will probably transport the radioactive material across Kirtland AFB, to conduct the reciprocity activity at Sandia. Under this scenario, you will be transporting radioactive material across Kirtland AFB under DOT regulations and not under reciprocity for Kirtland AFB; therefore, there is not a requirement to notify this office for reciprocity for Kirtland AFB, only for Sandia. Other reference numbers will be assigned when clarifications are received in this office. Once assigned, please refer to the appropriate RTS reference number in any future communications.

RTS Reference Number	Proposed Location of Work
582	Kirtland Air Force Base (AFB), Albuquerque, NM
583	Sandia National Labs, Albuquerque, NM

You must submit an NRC Form 241 clarification report when you propose to add locations of work, add or delete dates of work, change work site contacts, use different radioactive materials, or elect to perform additional work activities within NRC jurisdiction, and subsequently provide those changes to this office. Please note, all notifications or clarifications of work activities or changes to the information submitted on the initial NRC Form 241 must include as a minimum, the following information: licensee name, agreement state license number, location of work, dates of work, and the signature of the RSO or designee.

Information submitted on NRC Form 241 must be specific regarding the location and dates of use. Since your reciprocity request is for various locations over an extended period of time, you are required to notify this office three days prior to each of the proposed generally licensed activities. However, given the nature of your licensed activities, the time requirement specified in 10 CFR 150.20(b)(1) for filing an NRC Form 241 clarification report and any subsequent notifications has been waived, provided that you:

- A. Inform this office by telephone or facsimile of work activities or changes to the information submitted on the initial NRC Form 241, and
- B. Receive oral or written authorization for the activities from this office, and
- C. Submit written confirmation within 3 days after the notification.

Enclosed is an NRC signature copy of your NRC Form 241. We appreciate your cooperation. If you have questions concerning this letter or other aspects of working in NRC jurisdiction under reciprocity, please contact me at 817-276-6552.

Please use one of the following FAX numbers for submitting NRC Form 241 clarifications.

817-860-8263

817-860-8188

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response, if you provide one, will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

Rachel S. Browder, Health Physicist
Nuclear Materials Licensing Branch
