Subject: Response to 3/24/03 Letter

This is in regards to our conversation today regarding your letter dated 3/24/03 requesting copies of certain military licenses. Based on our discussions, you clarified that this request was made in response to a recent Florida Department of Health inspection of your facility. You stated that you had committed to the Florida inspector to make an attempt to get such copies of licenses from the NRC. During that conversation, I informed you that the information you requested is available; however, the amount of copies to be made of such licenses could be in the hundreds of licenses/permits. I also stated that such a request would more than likely need to be made through a Freedom of Information Act. However, you stated that based on our discussions you would not need them due to the amount work that would be required to obtain such copies of licenses. If the state inspector has any questions regarding our conversation, please feel free to have him contact me regarding this matter. Also, I forgot to mention one other alternative. Maybe you should request such documents through your military contacts whom you distribute such instruments to. I apologize for not being a lot of help but I was able to forward your request regarding the other matter to Marvin Peterson in NRC HQ. Unfortunately, I got an automatic E-Mail reply stating that he was not in and forwarded the E-Mail to Clarence Breskovic. If you have any other questions regarding these matters or need further assistance in contacting others please call me. Thanks.
