MEMORANDUM TO: John T. Larkins, Executive Director
Advisory Committee on Reactor Safeguards

Charles E. Ader, Chairman
Committee To Review Generic Requirements

FROM: R. William Borchardt, Acting Deputy Director/**RA**
Office of Nuclear Reactor Regulation

SUBJECT: DEVELOPMENT OF REVISED FIRE PROTECTION STANDARD
REVIEW PLAN AND BRANCH TECHNICAL POSITION

Section 9.5.1, "Fire Protection Program," of the Standard Review Plan (SRP), NUREG-0800, and Branch Technical Position (BTP) SPLB 9.5-1, Guidelines of Fire Protection for Nuclear Power Plants are attached. These documents are intended to be used with Regulatory Guide (RG) 1.189, "Fire Protection for Operating Nuclear Power Plants."

The attached draft SRP is a revision to the current fire protection SRP from July 1981. The SRP and BTP are based on technical information that was vetted during the development of RG 1.189. This revision gathers existing review guidance into one document for shutdown or decommissioned reactors, advanced reactors, license renewal, review criteria for fire probabilistic risk assessment, and power uprates.

We request Advisory Committee on Reactor Safeguards (ACRS) and Committee To Review Generic Requirements (CRGR) agreement that re-review (and re-comment) on this guidance is not necessary, since these documents are based on previously reviewed NRC practices and are consistent with the associated regulatory guide.

If you have any questions, please contact Mr. Daniel Frumkin of my staff (301-415-2280).
