DOE  
RES

Farouk,

We (NE-20) held a brief discussion today on agenda items for our planned meeting on PBMR fuel qualification. I will draft an agenda to send to you next week for comment. The agenda will focus primarily on the following three items:

- \* Comparison of NRC and DOE visions of test programs
- \* Shipment of pebbles from Germany to US
- \* Draft project-specific annex to DOE/NRC MOU

Please let me know if you agree with the emphasis on these three items. We can try to cover other topics as well.

The participants on our side will be:

myself  
Shane Johnson  
Tom Miller  
Madeline Feltus  
Mark Roth (on MOU)  
one ORNL rep  
one INEEL rep

We assume that your attendance will consist of:

yourself  
Don Carlson  
Stu Rubin  
shipping logistics rep (on pebbles from Germany)

Please let me know if your team will be much larger so that I can plan the room size accordingly. I will be in San Diego next week and will be back in the office on Thursday. In the meantime, I will be checking my voicemail and will attempt to check my email.

Best regards,

Alice Caponiti
