Subject: additional RAI set from SRXB

Stu:

The attached set of RAIs on heat removal was erroneously left off my previous e-mail. This is the last of NRR RAIs until we provide the fuel manufacturing and fuel qualifications RAIs which are due in May.

>>> Stuart Rubin 03/26/02 03:36PM >>> *RES*

✓ The RAIs for the attached white paper review areas are due to Farouk by March 29, 2002. The lead RES staffer for each area should have been coordinating with his/her NRR/NMSS staff counterparts for each white paper. (But I don't have a good feeling that this was being done in all cases.)

Amy Cabbage promised me today that NRR would provide their input on time.

We need to start formally assigning work like Amy does in NRR.. This management control system enhancement is on Peggy's "to do list."
