Docket No. 72-26
Diablo Canyon Independent Spent Fuel Storage Installation
Supplemental Slope Stability Responses to Additional NRC Questions for the Diablo Canyon Independent Spent Fuel Storage Installation Application (TAC No. L23399)

Dear Commissioners and Staff:

By letter dated December 21, 2001, the Pacific Gas and Electric Company (PG&E) submitted an application to the U. S. Nuclear Regulatory Commission (NRC) for a 10 CFR 72 site-specific license to build and operate an independent spent fuel storage installation (ISFSI) at the Diablo Canyon Power Plant site. The application included a Safety Analysis Report, Environmental Report, and other required documents in accordance with 10 CFR 72.

By letter dated August 29, 2002, the NRC staff requested additional information needed to continue their review of the Diablo Canyon ISFSI License Application. PG&E submitted its response to the NRC staff by letter dated October 15, 2002 (PG&E Letter DIL-02-009).

Enclosure 1 contains supplemental information to address additional NRC slope stability questions. Enclosure 2 contains a list of attachments followed by the attachments.

Members of the Diablo Canyon Independent Seismic Hazards Review Board advised PG&E for the Diablo Canyon ISFSI Project based on their subject areas of interest. Refer to PG&E Letter DIL-01-006, dated December 21, 2001, for the primary functions of the Review Board and the identification of original Review Board members.
