Subject: Current Drafts of D-B SDP

Gary,

Here are two documents that are in such a state of flux that I need to request that you not distribute them further by electronic means. The first is the latest edit of the risk assessment (SDP?) and the second is a rewritten piece of that document that I am using to iron out quality issues with RES on the analysis for the as-found cavity. The info in the second document supercedes the info in the first document.

Steve
