release

I promised Jack that we would forward this to him. Would you please see that he gets a copy.

Thanks.

Subject: Draft TIA Response

*dup
from the bar*

Sonia,

Attached is the draft response letter to the TIA and the draft attachments to that response. Attachment C is the RSXB report on the effects of collateral damage to the control rods on reactivity control/shutdown. It is already in ADAMS, with accession number ML021340306.

I will be out of the office until 10/7, so I wanted you and the other interested Region III folks to have the time to think about this while I'm gone. Mike wants to finalize it shortly after I get back.

Steve
