 Subject: Fwd: Memo to Commission -Preliminary Plan. Rev. 4-2.wpd

4/11/01 - Brian:

In response to your first question below, attached is the latest copy of the Commission paper. RES advised that it is with Ashok Thadani for concurrence and then will go to the EDO for signature. The paper requests Commission approval to proceed with the work, including the DOE-sponsored work.

In response to your comment that the reimbursable agreement SOW does not conform to your guidance, let's discuss. Some of the key words used in the SOW section titled, "Gas Reactor Regulatory Framework" concern me. The section includes phrases such as: "coordination with industry", "regulatory framework", "licensing requirements", and "licensing criteria". The work appears to be more related to Regulatory Framework and Process, than to the Technology Assessment work which was considered appropriate for reimbursement.

Joel

PREVIOUS MESSAGE:

Joel - I don't have a copy of the Commission paper or any resulting approvals/SRMs. If you locate them, please let me know. Also, I took a quick look at the work that NRC would perform for DOE and I do not believe that it conforms to the guidance outlined in my March 3 note to RES/King. Brian
