**Subject:** Re: Information on LER 346-2002-002-00

HI,

1. Yes we did receive a copy of the licensee's risk assessment and this has been reviewed in Region III and in NRR. It was dated April 8, 2002 and the licensee plans an update to their submittal by May 10. The Region, after discussing with NRR has decided to send the licensee a set of questions to assist us in evaluating the risk-significance of this event. We have not completed our own assessment of the significance of the event.

2. I will get a copy of the licensee's initial and subsequent risk-assessment submittals to you.

Christine Lipa

AIT for Davis Besse  
 In this LER, the licensee discussed their probabilistic assessment of vessel head nozzle leak problem.  
 So,  
 q1- did we get a copy of this assessment from the licensee and evaluate it in Reion III?  
 q2- if so, could you please send me (RES\DRAA\OERAB) a copy of this probabilistic assessment?

Here, I take the lead in this analysis. Thanks.
