

October 31, 1983

TO ALL LICENSEES OF OPERATING POWER REACTORS AND APPLICANTS FOR
OPERATING LICENSEES (GENERIC LETTER 83-38)

SUBJECT: NUREG-0965, "NRC INVENTORY OF DAMS"

Enclosed for your information is a copy of the subject report which describes in detail the NRC Dam Safety Program. The information provided in this report was obtained from NRC files such as safety analysis reports. The primary purpose of the report is to identify all dams that could, in any way, be considered "NRC dams" in the context of the Guidelines of the Federal Dam Safety Program (Reference 1). A secondary purpose is to identify the dams for which the Federal Guidelines may be applicable and for which the NRC might be considered "responsible".

As stated above this report is provided for information only; however, if you find that some data is incorrect, please inform the Dam Safety Officer, Mr. George E. Lear, via the Project Manager for your plant.

Original signed by
Darrell G. Eisenhut

Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
