**Subject:** Point Beach Aux Feed Red Issue

Folks

Just a note to keep you aware of the status. During our caucus, we seemed pretty well convinced that we should not consider this to be an "old design" issue. While we are still doing some homework on this, it still appears inappropriate to treat it as an old design issue since we believe that criterion 3 of MC 0305 6.06a isn't met. We are working on a com plan and the "Final Significance Determination" letter with hopes of getting it out next week.

JJ
