Rob,

I had a phone call with Bill Dean yesterday regarding our request, and to no surprise, the issue of cost has come up since it was raised as a potential concern in e-mail traffic yesterday. In addition to the costs for the program as well as transportation and disposal costs, we need to confirm the ORNL ability to receive and post process the 40" diameter pieces.

Will you please contact Richard and Randy at ORNL and get some feed back on the above questions?

Thanks,

Niles
