OFFICE OF NUCLEAR REACTOR REGULATION
WASHINGTON, D.C. 20555

September 7, 1993

NRC ADMINISTRATIVE LETTER 93-03: OPERATOR LICENSING NATIONAL EXAMINATION
SCHEDULE

Addressees

All power reactor licensees and applicants for an operating license.

Purpose

The U. S. Nuclear Regulatory Commission (NRC) is issuing this administrative letter to request addressees, on a voluntary basis, to update their previous estimates of the number of candidates to be tested for fiscal years (FYs) 1994 through 1997. The estimates will assist the NRC in planning its resources. The submittal of this information is strictly voluntary. Therefore, no specific action or written response is required.

Background

In Generic Letter (GL) 89-03, "Operator Licensing National Examination Schedule," March 24, 1989, the NRC issued its first national examination schedule and requested licensees to provide estimates of the number of candidates requiring examination. Subsequent GLs have updated this process. To plan its resources for FYs 1994 through 1997, the NRC is requesting licensees to update their estimates submitted in response to GL 92-06, "Operator Licensing National Examination Schedule," September 16, 1992.

Discussion

The NRC regional offices normally schedule examinations consistent with the enclosed examination schedule (Enclosure 1). However, if the workload within a region or across the nation is excessive during a particular month, the NRC may need to adjust some designated examination dates to balance its resources. The NRC regional offices will coordinate shifts in examination dates with the training managers of affected licensees if changes are required to the requested examination schedules.

The staff has proposed an amendment to "Operators' Licenses," Part 55 of Title 10 of the Code of Federal Regulations that will alter its approach for conducting requalification program evaluations. If the proposed amendment is approved in its current form, the NRC will discontinue use of the national examination schedule for licensee-administered requalification examinations.

PDR ADOCK 05000003 V 930907

9309010007

updated 7/28/94

IDVR-5-ADMIN
Letter

FOI
1/1

Beginning in FY 1995, the generic fundamentals examination (GFE) will be given only two times a year. The GFE will be administered on the first Wednesday following the first Sunday in the months of October and April. All other aspects of and procedures for administering the GFE will remain the same.

Requested Information

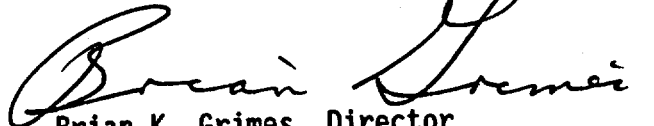

Using the proposed format on NRC Form 536, "Operator Licensing Examination Data," included as Enclosure 2, please update (1) the estimated number of candidates to be examined during each scheduled site visit, (2) the annual requalification examination schedule for FYs 1994 through 1997, and (3) the estimated number of candidates that will participate in the GFE scheduled for FY 1994.

Licensees are requested to voluntarily submit their updated schedules to Mr. Robert M. Gallo, Chief, Operator Licensing Branch, OWFN-10D22, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a courtesy copy to the appropriate regional administrator within 30 days of receiving this letter.

Paperwork Reduction Act Statement

The voluntary information collections contained in this request are covered by the Office of Management and Budget clearance number 3150-0131, which expires August 31, 1995. The public reporting burden for this voluntary collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this voluntary collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch (MNBB-7714), U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-3019, (3150-0131), Office of Management and Budget, Washington, D.C. 20503.

This administrative letter requires no specific action or written response. If you have any questions about this letter, please contact the contact listed below or the appropriate Office of Nuclear Reactor Regulation project manager.
