NRC ADMINISTRATIVE LETTER 94-13, REVISION 1: ACCESS TO NUCLEAR REGULATORY
COMMISSION BULLETIN BOARD
SYSTEMS

Addressees

All NRC licensees.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this administrative letter (AL) revision to give addressees updated information concerning the availability of NRC bulletin board systems (BBSs). This AL does not transmit or imply any new or changed requirements or staff positions. No specific action or written response is required.

Background

The NRC issued AL 94-13, "Access to Nuclear Regulatory Commission Bulletin Board Systems," on September 13, 1994, to inform addressees of the availability of NRC BBSs containing the Standard Technical Specifications, NRC generic communications, and files on several other subjects. Because of continuing efforts to make information more readily available to the public, NRC made a number of improvements and additions to NRC BBSs in the intervening months.

Discussion

The NRC operates several subsystems on the Federal Government Fedworld BBS, operated by the National Technical Information Service (NTIS). The names of the NRC subsystems on Fedworld, the information they contain, and their associated NRC contacts are presented in Attachment 1. The NRC also operates some stand-alone systems (i.e., not on, but accessible from, Fedworld). The names of these systems, the information they contain, and their associated NRC contacts are shown in Attachment 2. Information on accessing the various systems is given in Attachment 3. Except for the Bibliographic Retrieval System, new users for each system establish their own password when they first log on to the system. Information on how to obtain a password for the Bibliographic Retrieval System is given in Attachment 3.

Users who access any of these systems through a modem should set their communications parameters as follows:

- bits/character - 8
- parity - N
- number of stop bits - 1
- full duplex

Users should know (1) the protocol their telecommunications software will use for downloading files and (2) the command(s) necessary to initiate a file transfer using their software.

Although every effort is made to ensure that the information on each BBS is accurate, documents obtained from the BBSs are not considered official documents. Every user explicitly acknowledges that all information obtained from the BBSs is provided "as is" without warranty of any kind, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose and that the entire risk of acting on information obtained from the BBSs, including the entire cost of all necessary remedies, is with those who choose to act on such information and not with the operators of the BBSs.

This administrative letter requires no specific action or written response. If you have any questions about this letter, please contact one of the contacts listed below or the appropriate Office of Nuclear Reactor Regulation (NRR) project manager.
