NUCLEAR REGULATORY COMMISSION
OFFICE OF NUCLEAR REACTOR REGULATION
WASHINGTON, D.C. 20555

**NRC ADMINISTRATIVE LETTER 94-07: DISTRIBUTION OF SITE-SPECIFIC AND STATE
EMERGENCY PLANNING INFORMATION**

Addressees

All holders of operating licenses and construction permits for nuclear power reactors.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this administrative letter to inform addressees that the NRC would welcome receipt of copies of the information brochures that are disseminated annually to the public pursuant to 10 CFR Part 50, Appendix E, and also updated State and/or local emergency plan information. This information will be used to augment the information contained in the site emergency plan. Placing the NRC on the distribution list is strictly voluntary. Therefore, no specific action or written response is required.

Discussion

Licenses are required to disseminate basic emergency planning information annually to those members of the public within the plume exposure pathway emergency planning zone. In addition, most licenses update their State and/or local emergency plans annually. The NRC has found that the information in these documents is very useful when used together with the site emergency plan during emergency exercises and actual events. This information is used to ensure that the NRC and other authorities use the same terminology and place names when referring to simulated or real actions to protect the public.

Requested Information

Licenses who wish to voluntarily submit 10 copies of their annual emergency planning information brochures and 1 updated copy of their State and/or local emergency plans are requested to send these, when issued, to the Chief, Incident Response Branch, Office for Analysis and Evaluation of Operational Data, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A current version of the brochures and plans would also be useful in advance of the next annual issuance.
