#### January 13, 1994

## NRC ADMINISTRATIVE LETTER 94-01: FORTHCOMING NRC MEETING WITH INDUSTRY TO DISCUSS THE POTENTIAL FOR PRESSURE LOCKING AND THERMAL BINDING OF GATE VALVES

#### Addressees

All holders of operating licenses or construction permits for nuclear power reactors.

#### <u>Purpose</u>

The U.S. Nuclear Regulatory Commission (NRC) is issuing this administrative letter to inform addressees of the forthcoming NRC meeting with industry to discuss the potential for pressure locking and thermal binding of gate valves. This administrative letter does not transmit or imply any new requirements or staff positions. No specific action or written response is required.

#### Background

In March 1993, NRC published NUREG-1275, Volume 9, "Operating Experience Feedback Report - Pressure Locking and Thermal Binding of Gate Valves." In the report, the staff reviewed operating events involving these failure mechanisms and identified: (1) the conditions under which the failure mechanisms have occurred, (2) the spectrum of safety systems that have been subjected to the failure mechanisms, and (3) the conditions that may introduce the failure mechanisms under both normal and accident conditions.

#### **Discussion**

NRC has scheduled a public meeting to discuss Generic Letter (GL) 89-10, "Safety-Related Motor-Operated Valve Testing and Surveillance." This meeting will focus on potential pressure locking and thermal binding of gate valves installed in safety-related systems of both boiling-water and pressurizedwater reactors. NRC will present an evaluation of related industry experience and planned regulatory activities. In addition, utility representatives may discuss ongoing industry activities related to pressure locking and thermal binding. The NRC presentation will include responses to questions received from interested parties, licensees, and applicants. Attachment 1 is the agenda for the meeting.

The meeting, which is open to the public, will be held on February 4, 1994, from 8:00 a.m. to 5:00 p.m. at the New Orleans Marriott, 555 Canal Street, New Orleans, Louisiana 70140, Telephone (504) 581-1000.

### **Related Generic Communications**

In addition to GL 89-10, NRC has issued a number of generic communications pertaining to either pressure locking or thermal binding of gate valves. Among these are NRC Office of Inspection and Enforcement (IE) Circular 77-05, "Fluid Entrapment in Valve Bonnets," IE Information Notice (IN) 81-31, "Failure of Safety Injection Valves to Operate Against Differential Pressure," and NRC IN 92-26, "Pressure Locking of Motor-Operated Flexible Wedge Gate Valves."

This administrative letter requires no specific action or written response. If you have any questions about this letter, please contact the contact listed below or the appropriate Office of Nuclear Reactor Regulation (NRR) project manager.
