Subject: order probiting involvement in nrc-licensed activities

I accept the conditions set forth in this order, and I thank the NRC for allowing me to continue to operate as a radiographer. I would like to have the order relaxed to "The Order prohibits your involvement in the management, oversight, or supervision of Byproduct Nuclear Material Licensed activities.

I am currently looking for work in the comercial nuclear power industry. In the past I have aced as job monitor and Quality Control Inspector for fuel pool projects that include rad waste shipments. I would somehow like to seperate the two industries to make certain I do not get into a gray area with this order. I have about 16 years of nuclear power experience and have descided to go back to them.

As I said, I accept the conditions of the order but would like to have it clarified or relaxed.

Thank You,

Donald F. Hinman
