NUCLEAR REGULATORY COMMISSION
OFFICE OF NUCLEAR MATERIAL SAFETY AND SAFEGUARDS
WASHINGTON, D.C. 20555

March 7, 1990

NRC INFORMATION NOTICE No. 90-15: RECIPROCITY: NOTIFICATION OF AGREEMENT
STATE RADIATION CONTROL DIRECTORS BEFORE
BEGINNING WORK IN AGREEMENT STATES

Addressees:

All holders of Nuclear Regulatory Commission (NRC) materials licenses which authorize use of radioactive material at temporary job sites.

Purpose:

This information notice provides guidance to materials licensees about notifying Agreement State Radiation Control Directors before working with NRC-licensed material in an Agreement State. It is expected that recipients will review this notice for applicability to their NRC licensed programs to ensure compliance with Agreement State requirements. No written response to this information notice is required.

Discussion:

Many NRC licensees, particularly radiographers, well-loggers, and portable gauge users, are authorized to use radioactive material at temporary job sites. However, this authorization does not permit operations in the 29 Agreement States (except for licensees who are Federal Agencies). Some Agreement States have reciprocity provisions that permit NRC licensees to perform work using NRC-licensed radioactive materials in their States. In some Agreement States, you will need to obtain a license to perform work using licensed materials. Most Agreement States permit reciprocity for as long as 180 days per year and some permit reciprocity for as little as 20 days per year. NRC licensees are advised that they should notify the Agreement State in advance of doing work in that State.

We have attached telephone numbers for all the Agreement States and a map showing the location of Agreement States.
