

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

May 14, 1990

TO: ALL POWER REACTOR LICENSEES AND APPLICANTS

SUBJECT: RELAXATION OF STAFF POSITION IN GENERIC LETTER 83-28,
ITEM 2.2 PART 2, "VENDOR INTERFACE FOR SAFETY-RELATED
COMPONENTS" (GENERIC LETTER 90-03, SUPPLEMENT NO. 1)

Generic Letter 90-03, dated March 20, 1990, was issued to clarify the staff position concerning Part 2 of Item 2.2 of Generic Letter 83-28 (Vendor Interface for Safety-Related Components). Licensees and applicants were requested to review their present vendor interface programs and modify them as necessary to ensure that both of the elements described in Generic Letter 90-03 were included or have been scheduled for implementation.

The purpose of this supplement is to clarify the examples of key safety-related equipment listed on page 2 of Generic Letter 90-03. Subsequent to issuing the generic letter, we discovered that due to an administrative error diesel generators and safety-related electrical switchgear were inadvertently deleted from the list of examples of key, safety-related components on page 2 of the generic letter. Therefore, the last paragraph on page 2 of the generic letter should be modified to include these two items.

This letter is for information purposes only and no specific action or written response is required. Questions on this matter should be addressed to the technical contacts listed in Generic Letter 90-03.

Sincerely,

A handwritten signature in dark ink, appearing to read "James G. Partlow".

James G. Partlow
Associate Director for Projects
Office of Nuclear Reactor Regulation
