Subject: Re: NRR Staff Participation in PBMR Analytical Codes Reviews

Stu,

Yuri Orechwa, Undine Shoop, Ralph Caruso and Frank Akslutewicz from the reactor systems branch will attend the August meeting.

Amy

RES  
Exelon has informed us that they will kickoff discussions on analytical codes at the August 15 -16, 2001 PBMR pre-application meeting. The RES lead assignments for the three code areas identified by Exelon are tentatively as follows:

Core design: Don Carlson w/Tony Ulses support  
Shutdown cooling, TBD by J. Uhle  
Shutdown capability: Don Carlson w/Tony Ulses support

Diane/Amy:

Please provide me with the NRR individuals who will follow the above three areas. (I assume Undine will have the first and the third.)

Diane/Amy/Mike:

Since the codes are likely to involve pebble mechanical flow modeling I think we should include someone with a mechanical design background to take the review lead (RES/DET) and review follow (NRR) for this aspect too.

I will let you know the precise day and time for these topics at the August meeting after I have had an opportunity to discuss the detailed agenda with Exelon.

Thanks.

Stu
