| a. The operating test conforms to the previously approved outline; changes are consistent with sampling requirements (e.g., 10 CFR 55.45, operational importance, safety function distribution). | JAS | WLS | JH |
| b. There is no day-to-day repetition between this and other operating tests to be administered during this examination. | JAS | WLS | JH |
| c. The operating test shall not duplicate items from the applicants' audit test(s)(see Section D.1.a). | JAS | WLS | JH |
| d. Overlap with the written examination and between operating test categories is within acceptable limits. | JAS | WLS | JH |

| 2. WALK-THROUGH (CATEGORY A & B) CRITERIA | -- | -- | -- |
| a. Each JPM includes the following, as applicable: <ul style="list-style-type: none"> • initial conditions • initiating cues • references and tools, including associated procedures • validated time limits (average time allowed for completion) and specific designation if deemed to be time critical by the facility licensee • specific performance criteria that include: <ul style="list-style-type: none"> ○ detailed expected actions with exact criteria and nomenclature ○ system response and other examiner cues ○ statements describing important observations to be made by the applicant ○ criteria for successful completion of the task ○ identification of critical steps and their associated performance standards ○ restrictions on the sequence of steps, if applicable | JAS | WLS | JH |
| b. The prescribed questions in Category A are predominantly open reference and meet the criteria in Attachment 1 of ES-301. | JAS | WLS | JH |
| c. Repetition from operating tests used during the previous licensing examination is within acceptable limits (30% for the walk-through) and does not compromise test integrity. | JAS | WLS | JH |
