Dear Mr. Bolleer,

Thank you for contacting the Muscogee (Creek) Nation of Oklahoma. In looking at the site on 41st. street with the following description: the Southern boundary of Sec 23, T19N, R13E, in Tulsa County, Oklahoma, We find that in checking with our resources, there is not any religious or sacred sites within this project area that will be affected by the undertaking of your project. Possibly, At one time, there could have been ceremonial sites in the proximity, but due to development the sites would require a lot of research just to locate them.

However, We expect to be notified in case of culturally related discoveries within the project area as required by the NAGPRA laws. Also please forward any reports/findings that are produced from the project area.

Sincerely,

Tim Thompson
