CENTRAL EMERGENCY CONTROL CENTER (CECC) OPERATIONS

1.0 PURPOSE

This procedure is designed to direct the CECC Director and staff to ensure consistent, accurate, and timely response to the events of an accident. This procedure further serves to identify the necessary information to provide for prompt, accurate, public protective action recommendations to appropriate State authorities.

2.0 SCOPE

This procedure covers anticipated requirements of the CECC Director and staff during an emergency classification of Notification of Unusual Event (if it is decided to staff or partially staff the CECC), Alert, Site Area Emergency, or General Emergency

3.0 STAFFING

Responsibilities for CECC staff are contained in Attachments to this procedure as well as in other CECC EIPs. The CECC Director may also obtain assistance from other organizations within TVA. Representatives from these organizations may report to the CECC if requested by the CECC Director. Representatives and notification information are provided in the REND.

3.1 Activation and Notification

The initial notification of an event comes from the ODS via the Emergency Paging System, or by manual call out. Activation of non-duty personnel for unscheduled work shall meet FFD criteria and be documented using Appendix M.

3.2 Emergency Duty Officer (EDO)

The EDO is responsible for establishing initial operability of the CECC upon activation of the center. This position will obtain information from the ODS pertinent to the event and make this information available to key CECC positions. The EP Staff will advise the CECC Director on the REP, notification requirements and operation of the CECC. A checklist for this position is provided in Appendix A.

3.3 CECC Director

The CECC Director is responsible for directing TVA's overall response to the emergency. The CECC Director ensures that Federal, State, and local agencies are notified in accordance with established procedures and that they are kept fully informed of all aspects of the emergency. The Director reviews with the Plant Assessment and Radiological Assessment Managers the onsite and offsite consequences of the accident and assesses the adequacy and need for measures taken for protection of the public. The Director coordinates TVA's efforts with State and Federal agencies involved in the offsite aspects of the emergency and requests any required federal assistance through the NRC. Checklists for the CECC Director are provided in Appendices B through G. After the appropriate level of CECC activation the CECC Director is responsible for the following:

- Approves all press releases developed in the CECC
- Notifies the appropriate state authority of any emergency classification upgrades.
- Makes any required Protective Action Recommendations (PARs) to the appropriate state authority using Appendix I

**3.4 Plant Assessment Manager**

Plant Assessment Manager Responsibilities are contained in CECC EPIP-6.

**3.5 Radiological Assessment Manager**

Radiological Assessment Manager responsibilities are contained in CECC EPIP-7.

**3.6 Public Information Manager**

Public Information Manager responsibilities are contained in CECC EPIP-14.

**3.7 State Communicator**

The State Communicator shall ensure that all information required by State authorities to perform their assessment function and carry out necessary protective actions is being provided to them in a timely and accurate manner (see Appendix K). The CECC Director shall review for accuracy and approve all information being transmitted to the State in hardcopy form. (This excludes the automatic transmittal of the radiological assessment working information such as met data, dose code runs, plume plots, and field measurements sent to the State Radiological Health Assessors.) Checklists for this position are provided in Appendix J.

**3.8 TVA Liaison to the State**

For a classification of SITE AREA EMERGENCY OR GENERAL EMERGENCY, the CECC Director will coordinate with the REP staff representative the selection of a TVA liaison to the State Emergency Operations Center (EOC) in Tennessee or the SRMAC in Alabama. The CECC Director will authorize travel to the State facilities for the purpose of providing technical information, advice, and interpretation to State personnel. The TVA Liaison will also ensure that the State is getting all required information from the CECC.

Primary duties of the TVA Liaison to the State facilities are as follows:

- Technical explanations and clarification on plant status.
- Assist the State by keeping them informed of available TVA resources.
- Assist the State in describing/clarifying TVA's response to the emergency, understanding TVA's emergency organization, key TVA staff positions, etc.
- Maintains contact with the CECC State Communicator to ensure that all required information is being provided by the CECC.

**3.9 Technical Advisors**

The CECC Director will coordinate with the Plant Assessment Manager the selection of people to serve as a technical advisor to the Public Information Manager and staff and also to the State Communicator in the CECC. RADCON and/or Plant Operations advisors may also be selected to be sent to the appropriate State Emergency Operations Center. The advisors will be responsible for providing a nontechnical interpretation of the event for the CECC Public Information Staff.

If the JIC is to be staffed, the CECC Director will coordinate with the Plant Assessment and Radiological Assessment Managers the selection of radiological health and plant operations advisors to serve as technical advisors to the TVA spokesperson located there. These people will be responsible for assisting the TVA spokesperson in interpreting the approved press releases and events taking place.

Entire Procedure Revised.

**3.10 Management Services Supervisor**

The Management Services Supervisor oversees clerical and administrative support to the CECC. A checklist for this position is provided in Appendix L

**3.11 State Liaison (State Government Representative)**

The State Liaison role in the CECC is to observe events taking place, licensee response actions, and advise the State agencies appropriately throughout the emergency. He will receive assistance as necessary from the State Communicator. The State Liaison can also coordinate State support for TVA.

**3.12 Provisions for NRC**

Provisions have been made to provide workspace for a contingent of NRC staff in the CECC. These provisions include the NRC's FTS 2000 Emergency Telecommunications System. The following dedicated circuits are available: Health Physics Network (HPN), Reactor Safety Counterpart Link (RSCL), Protective Measures Counterpart Link (PMCL), Management Counterpart Link (MCL), Emergency Notification System (ENS), Local Area Network (LAN). HPN and ENS extensions are provided for TVA use as required.

**4.0 CECC RESPONSIBILITIES**

**4.1 Evaluation of Conditions**

The CECC staff maintains an awareness of plant conditions to assess the impact on the environment, the site, and to provide technical and logistical support to the site.

**4.2 Interface with the State**

The CECC provides the State with information on the emergency classification, plant conditions, offsite radiological conditions and Protective Action Recommendations (PARs). The State provides the CECC with information concerning State activities in response to the emergency.

**4.3 Protective Action Recommendations**

The CECC evaluates plant and radiological conditions and develops Protective Action Recommendations to be provided to the State to assist with decision making for the protection of the health and safety of the public.

**4.4 Public Information**

The CECC ensures timely and accurate information is provided to the public. The CECC will coordinate efforts with offsite authorities.

**4.5 Regulatory Interface**

The NRC role in the CECC is to observe and advise as appropriate with licensee decisions and actions.

The CECC Director may request that the Federal Radiological Emergency Response Plan (FRERP) be activated via the NRC.

#### **4.6 Termination of the Emergency**

The CECC Director will inform each emergency center when the SED has terminated the emergency and planning for the recovery phase has begun.

Upon termination of the emergency, the CECC Director and staff will make themselves available to the TVA, NRC, and other official event reviewers for review of the accident.

Appropriate recovery efforts shall be initiated upon termination of the emergency. The Senior Vice President, Nuclear Operations, or his designee, will direct the overall recovery efforts for response to an emergency in accordance with the general guidelines provided in the REP and CECC-EPIP-13. As judgment and events determine, additional resources outside of TVA may be required to mitigate the consequences of an emergency.

### GENERAL OPERATIONS

1. Log key events and major actions taken. Maintains accurate records of decisions made and actions started and completed.
2. Consult with SED on EALs, major site actions, and plant conditions.
3. Conduct briefings. The CECC Director should initially and periodically (approximately hourly) remind the CECC staff of the need for accuracy and consistency in the development and review of technical information, news releases, PARs, and State Update forms. The CECC staff should be reminded of the effect of various distractions (such as time restraints, noise, stress, and attention to competing tasks) can have on accuracy and efficiency. The Director should stress the need for the staff to manage distractions in a manner to prevent negative impacts on the accuracy of written, oral, and electronic communication from the CECC.
4. Coordinate with the JIC Spokesperson times of anticipated JIC briefings and provide status updates prior to the JIC briefings.
5. Ensures that Federal, State, and local agencies are notified in accordance with established procedures and that they are kept fully informed of all aspects of the emergency. Review anticipated state actions and discuss with State.
6. The CECC Director is authorized to request Federal assistance through the Federal Radiological Emergency Response Plan (FRERP) via the NRC.
7. Commits TVA resources and provides necessary information to assist the State, Federal, and local agencies to the extent possible.
8. Coordinates TVA's efforts with State and Federal agencies involved in the offsite aspects of the emergency.
9. Should operations be expected to last for an extended period, the CECC Director originates a schedule for relief. The duties of CECC staff should only pass to individuals identified as alternates for those positions. The Management Services Supervisor may be used to perform notifications of relief personnel.
10. When possible have CECC Staff monitor TSC briefings via telephone.

**ACTIVATION AND DEACTIVATION OF SUSPENDED RATE TELEPHONE LINES  
IN TVA AND STATE EMERGENCY FACILITIES**

Date: \_\_\_\_\_

TIME/INITIAL

Activation

\_\_\_\_\_/

Notify TVA Information Technical Service Center (ITSC) at (423) 751-4357 and request suspended rate lines in the facilities identified for activation be removed from suspended rate status. Refer to attachment for identified facility to be activated and request ITSC implement their procedure to activate suspended rate telephone lines.

**Browns Ferry JIC - Refer to Section 1.0 of this Appendix.**

**Browns Ferry SRMAC/AEMA Liaison - Refer to Section 2.0 of this Appendix.**

**Sequoyah/Watts Bar JIC - Refer to Section 3.0 of this Appendix.**

**Sequoyah FCC/RMCC - Refer to Section 4.0 of this Appendix.**

Follow instructions in the applicable attachment to return lines to suspended rate status.

\_\_\_\_\_/

TVA ITSC confirmed action has been completed to remove lines from suspended rate status.

Deactivation

\_\_\_\_\_/

ITSC and Telecommunications Support Services contacted at (423) 751-2228 to request the telephone lines be placed back in suspended rate status.

\_\_\_\_\_/

Notify Manager, Emergency Preparedness, State and Local Programs to follow up on request to return lines to suspended rate status.

- c. The ITSC will contact the EDO/State Communicator and confirm action has been completed to remove lines from suspended rate status.
- d. When the JIC is deactivated, the EDO/State Communicator will contact ITSC and Telecommunications Support Services at 751-2228 and request the above listed numbers be placed back in suspended rate status. The EDO/State Communicator will then request that the Manager, Emergency Preparedness, State and Local Programs follow up this request within 5 days and confirm this action has been completed.

**2.0                    ACTIVATION/DEACTIVATION REQUIREMENTS FOR STATE SRMAC FOR  
BROWNS FERRY**

- a. There are a limited number of suspended rate telephone lines in the State RMCC for Browns Ferry. These lines are located in the basement of the SRMAC/FCC portion of the Morgan County Emergency Operations Center in the basement of the Morgan County Courthouse. These lines must be removed from suspended rate status when the Director of the State Radiation Control Agency determines the RMCC is to be staffed in order to direct the activities of the field monitoring teams.
- b. To activate the telephone lines on suspended rates, the EDO/State Communicator will contact the TVA Information Technical Service Center (ITSC) at 751-4357 and request the following lines be activated using the lead telephone number.

**LEAD TELEPHONE NUMBER (EARNING NUMBER): 256-350-9362**

- c. The ITSC Center will contact the EDO/State Communicator and confirm action has been completed to remove lines from suspended rate status.
- d. When the SRMAC is deactivated, the EDO/State Communicator will contact ITSC and Telecommunications Support Services at 751-2228 and request the above listed numbers be placed back in suspended rate status. The EDO/State Communicator will then request that the Manager, Emergency Preparedness, State and Local Programs follow up this request within 5 days and confirm this action has been completed.

**APPENDIX N  
(Page 4 of 5)**

**3.0 ACTIVATION/DEACTIVATION REQUIREMENTS FOR SEQUOYAH/WATTS BAR JIC**

- a. There are 20 telephone lines in the Sequoyah/Watts Bar JIC that are on suspended rate status. These lines are assigned to the Media Work area which is located in the hallway outside of the basement auditorium in Missionary Ridge Place in the Chattanooga Office Complex. These lines must be removed from suspended rate status when the decision is made to staff the JIC.
- b. To activate telephone lines on suspended rates, the EDO/State Communicator will contact the TVA Information Technical Service Center (ITSC) at 751-4357 and request the following lines be activated using the lead telephone numbers.

**LEAD TELEPHONE NUMBERS (EARNING NUMBERS): 423-265-0300 & 423-265-0333**

After the above is requested the following lines will be activated:

**OPERATIONS DUTY SPECIALIST  
PROCEDURE FOR ALERT**

**1.0 PURPOSE**

This procedure is designed to direct the ODS during an Alert to ensure consistent, accurate, and timely response in the event of an emergency.

**2.0 SCOPE**

This procedure covers anticipated requirements of the ODS during an Alert. This procedure should not be used after the CECC has assumed responsibility for communications with the State under CECC EPIP-1.

**3.0 REFERENCES**

Radiological Emergency Plan

**4.0 ABBREVIATIONS AND DEFINITIONS**

EDO - Emergency Duty Officer  
ERDS - Emergency Response Data System  
ODS - Operations Duty Specialist  
CECC - Central Emergency Control Center

**5.0 RESPONSIBILITIES**

- 5.1 Upon notification by the Site Emergency Director that an Alert exists, the ODS is responsible for recording the preliminary report of information concerning the incident on Appendix A.
- 5.2 The ODS is responsible for notifying the appropriate State agency, CECC EDO, CECC Director, Plant Assessment Manager, Radiological Assessment Manager, Load Coordinator, TPS Transmission Dispatcher, and key CECC staff. The ODS is also responsible for notifying technical support personnel as requested.
- 5.3 The ODS is responsible for recording any follow-up information on Appendix B and notifying the appropriate State.

**6.0 PROCEDURE REQUIREMENTS**

**6.1 Actions to be Taken for an Alert**

The ODS performs the following tasks:

**NOTE:** When making notifications of an emergency situation, provide only the information contained on the attachment. Avoid any unnecessary explanation, interpretation, or elaboration of the information. Timeliness and accuracy is of the utmost importance.

(TIME/INITIALS)

\_\_\_\_ / \_\_\_\_ 6.1.1 Upon receiving a call from the Site Emergency Director:

**Turn on Recording Equipment** and enter the following information.

Current Date: \_\_\_\_\_

Current Time: \_\_\_\_\_

\_\_\_\_ / \_\_\_\_ 6.1.2 Refer to the form in Appendix A and log information to be provided to the State.

6.1.3 Make notification call to the appropriate State (not to exceed 15 minutes from the time of the declaration of the event).

call the ODS \_\_\_\_\_ Time: \_\_\_\_\_

(See numbers programmed on phones.)

(TIME/INITIALS)

\_\_\_\_ / \_\_\_\_ 6.1.4 If event **has been terminated** refer to CECC-EPIP-2 and perform Sections 6.1.4 through 6.1.10 of that procedure for notification and receive further guidance from the EDO.

\_\_\_\_ / \_\_\_\_ 6.1.5 If event **has not been terminated**, activate Emergency Paging System. Monitor the Emergency Paging System screen. If any critical positions do not respond within 15 minutes or indicate they cannot respond, then use the REND or REP duty list to contact duty or backup staff for those positions. Appendix C will be used to document Fitness for Duty for positions contacted by telephone. Steps 6.1.6 through 6.1.26 of this procedure should be done in parallel with these actions as time permits.

-OR-

If **Emergency Paging System is not operable**, notify the following and have them report to the center (see the REPTRACK Duty List or REND). Initial attempts to fill critical positions should be performed before moving on to non-critical positions and steps 6.1.6 through 6.1.26 of this procedure. Appendix C will be used to document fitness for duty.

**OPERATIONS DUTY SPECIALIST  
PROCEDURE FOR SITE AREA EMERGENCY**

**1.0 PURPOSE**

This procedure is designed to direct the ODS during a Site Area Emergency to ensure consistent, accurate, and timely response in the event of an emergency.

**2.0 SCOPE**

This procedure covers anticipated requirements of the ODS during a Site Area Emergency. This procedure should not be used after the CECC has assumed responsibility for communication with the State under CECC-EPIP-1.

**3.0 REFERENCES**

Radiological Emergency Plan

**4.0 ABBREVIATIONS AND DEFINITIONS**

EDO - Emergency Duty Officer  
ERDS - Emergency Response Data System  
ODS - Operations Duty Specialist  
CECC - Central Emergency Control Center

**5.0 RESPONSIBILITIES**

- 5.1 Upon notification by the Site Emergency Director that a Site Area Emergency exists, the ODS is responsible for recording the preliminary report of information concerning the incident on Appendix A.
- 5.2 The ODS is responsible for notifying the appropriate State agency, CECC EDO, CECC Director, Plant Assessment Manager, Radiological Assessment Manager, Load Coordinator, TPS Transmission D-is patcher, and key CECC staff. The ODS is also responsible for notifying technical support personnel as requested.
- 5.3 The ODS is responsible for recording any follow-up information on Appendix B and notifying the appropriate State.

**6.0 PROCEDURE REQUIREMENTS**

- 6.1 Actions to be Taken for a Site Area Emergency

The ODS performs the following tasks:

**NOTE:** When making notifications of an emergency situation, provide only the information contained on the attachment. Avoid any unnecessary explanation, interpretation, or elaboration of the information. Timeliness and accuracy is of the utmost importance.

(TIME/INITIALS)

\_\_\_\_ / \_\_\_\_ 6.1.1 Upon receiving a call from the Site Emergency Director:

**Turn on Recording Equipment** and enter the following information.

Current Date: \_\_\_\_\_

Current Time: \_\_\_\_\_

\_\_\_\_ / \_\_\_\_ 6.1.2 Refer to the form in Appendix A and log information to be provided to the State.

6.1.3 Make notification call to the appropriate State (not to exceed 15 minutes from the time of the declaration of the event).

Tennessee

TEMA Duty Officer: \_\_\_\_\_ Time: \_\_\_\_\_  
(Use the ringdown telephone as the primary means to contact TEMA. If this does not work, then use numbers programmed on phones.)

Alabama

Alabama Office of Radiation Control Duty Officer: \_\_\_\_\_ Time: \_\_\_\_\_

**AFTER HOURS NOTIFY**

Montgomery State Trooper Post to have the Office of Radiation Control Duty Officer call the ODS \_\_\_\_\_ Time: \_\_\_\_\_  
(See numbers programmed on phones.)

(TIME/INITIALS)

- \_\_\_\_ / \_\_\_\_ 6.1.4 If event has been terminated refer to CECC-EPIP-2 and perform Sections 6.1.4 through of that procedure 6.1.10 for notification and receive further guidance from the EDO.
- \_\_\_\_ / \_\_\_\_ 6.1.5 If the event **has not been terminated**, activate Emergency Paging System. Monitor the Emergency Paging System screen. If any critical positions do not respond within 15 minutes or indicate they cannot respond, then use the REND or REP duty list to contact duty or backup staff for those positions. Appendix C will be used to document Fitness for Duty for positions contacted by telephone. Steps 6.1.6 through 6.1.26 of this procedure should be done in parallel with these actions as time permits.

-OR-

**If Emergency Paging System is not operable**, notify the following and have them report to the center (see the REPTRACK Duty List or REND). Initial attempts to fill critical positions should be performed before moving on to non-critical positions and steps 6.1.6 through 6.1.26 of this procedure. Appendix C will be used to document fitness for duty.

- / 6.1.6 If event has not been terminated, activate the ERDS system (not to exceed 1 hour after the declaration of the event). If the ERDS system fails to activate continue with the next step (6.1.7) of this procedure.
- / 6.1.7 Inform the Site Emergency Director that the respective state has been notified.
- / 6.1.8 Notify the CECC EDO.
- / 6.1.9 Notify COC Security (751-3783) and request that security be established and key card access be initiated.

If the ODS is located in the Power Business Center and conditions allow relocation to the CECC continue with step 6.1.10 of this procedure, if the ODS is located in the CECC or is not relocating to the CECC proceed to section 6.1.17 of this procedure.

- / 6.1.10 Transfer 751-1700 to the cellular phone.
- / 6.1.11 Notify TEMA (for SQN and WBN events) that the ODS will be in transit to the CECC and that all calls should be made to 423-751-1700 until further notice.
- / 6.1.12 Relocate to the CECC.

Upon arrival in the CECC perform the following.

- / 6.1.13 Follow up on any calls received during transit to the CECC.
- / 6.1.14 Place the "A-B" switches for the Paging, ERDS and Alarm Notification Systems to the "A" position.
- / 6.1.15 Transfer 751-1700 and the three site ringdown phones from the cellular phone back to the desktop phone.
- / 6.1.16 Notify TEMA (for SQN and WBN events) that the ODS is in the CECC and can now use the ringdown phone for communications.

- / 6.1.17 Notify J. E. Maddox (See REND Call-Out List-SNE).
- / 6.1.18 Notify J. A. Scalice (See REND Call-Out List-SNE).
- / 6.1.19 Notify the Load Coordinator of the condition (751-7547).
- / 6.1.20 Notify the TPS Transmission Dispatcher of the condition.  
BFN: SW Dispatch 751-4203  
SQN: SE Dispatch 751-4208  
WBN: NE Dispatch 751-4204
- / 6.1.21 Upon receiving telecopy of the Site Emergency Director event form, verify the information recorded on Appendix A of this procedure is correct.
- \*        / 6.1.22 Telecopy Appendix A of this procedure to the affected State.  
AL. Office of Radiation Control (334) 206-5387  
TEMA (615) 242-9635

- \_\_\_\_ / \_\_\_\_ 6.1.23 Verify that the telecopy to the State has been received (only during normal working hours for AL. Office of Radiation Control). Use programmed telephone number for the affected State.
- \_\_\_\_ / \_\_\_\_ 6.1.24 If the ERDS system failed to activate in step 6.1.6 of this procedure, notify the computer support duty officer and the NRC duty officer at telephone number (301) 816-5100.
- \_\_\_\_ / \_\_\_\_ 6.1.25 Refer to the form in Appendix B, log follow-up information, and provide to the appropriate State.
- \_\_\_\_ / \_\_\_\_ 6.1.26 Continue attempts to contact any critical or non-critical positions in section 6.1.5 of this procedure that have not responded.

- \_\_\_\_ / 6.1.7 Activate the ERDS system (not to exceed 1 hour after the declaration of the event). If the ERDS system fails to activate, continue with the next step (6.1.8) of this procedure.
- \_\_\_\_ / 6.1.8 Inform the Site Emergency Director that the State and appropriate local Emergency Management Agencies have been notified.
- \_\_\_\_ / 6.1.9 Notify the CECC EDO.
- \_\_\_\_ / 6.1.10 Notify COC Security (751-3783) and request that security be established and key card access be initiated.

If the ODS is located in the Power Business Center and conditions allow relocation to the CECC continue with step 6.1.11 of this procedure. If the ODS is located in the CECC or is not relocating to the CECC proceed to section 6.1.18 of this procedure.

- \_\_\_\_ / 6.1.11 Transfer 751-1700 to the cellular phone.
- \_\_\_\_ / 6.1.12 Notify TEMA (for SQN and WBN events) that the ODS will be in transit to the CECC and that all calls should be made to 423-751-1700 until further notice.
- \_\_\_\_ / 6.1.13 Relocate to the CECC.

Upon arrival in the CECC perform the following:

- \_\_\_\_ / 6.1.14 Follow up on any calls received during transit to the CECC.
- \_\_\_\_ / 6.1.15 Place the "A-B" switches for the Paging, ERDS and Alarm Notification Systems to the "A" position.
- \_\_\_\_ / 6.1.16 Transfer 751-1700 and the three site ringdown phones from the cellular phone back to the desktop phone.
- \_\_\_\_ / 6.1.17 Notify TEMA (for SQN and WBN events) that the ODS is in the CECC and can now use the ringdown phone for communications.

- \_\_\_\_ / 6.1.18 Notify J. E. Maddox (See REND Call-Out List-SNE).
- \_\_\_\_ / 6.1.19 Notify J. A. Scalice (See REND Call-Out List-SNE).
- \_\_\_\_ / 6.1.20 Notify the Load Coordinator of the condition (751-7547).
- \_\_\_\_ / 6.1.21 Notify the TPS Transmission Dispatcher of the condition.  
BFN: SW Dispatch 751-4203  
SQN: SE Dispatch 751-4208  
WBN: NE Dispatch 751-4204
- \_\_\_\_ / 6.1.22 Upon receiving telecopy of the Site Emergency Director event form, verify the information recorded on Appendix A of this procedure is correct.

- \*        /        6.1.23 Telecopy the affected plant page of Appendix A of this procedure to the affected State.

AL Office of Radiological Control (334) 206-5387  
TEMA (615) 242-9635

- /        6.1.24 Verify that the telecopy to the State has been received (only during normal working hours for AL Office Radiological Control). Use programmed telephone number for the affected State.

- /        6.1.25 If the ERDS system failed to activate in step 6.1.7 of this procedure, notify the computer support duty officer and the NRC duty officer at telephone number (301) 816-5100.

- /        6.1.26 Refer to the form in Appendix B, log follow-up information, and provide to the appropriate state.

- /        6.1.27 Continue attempts to contact any critical or non-critical positions in section 6.1.6 of this procedure that have not responded.

**DOSE ASSESSMENT STAFF ACTIVITIES DURING NUCLEAR PLANT RADIOLOGICAL EMERGENCIES**

**1.0 PURPOSE**

To guide Dose Assessment in obtaining necessary information, calculating dose rates and doses, and communicating assessment results used in responding to radiological emergencies at nuclear power plants.

**2.0 SCOPE**

This procedure applies to activities of Dose Assessment in actual and hypothetical radiological emergency situations. While the activities of the Dose Assessment staff are expected to follow this procedure, it is expected that circumstances may arise during an event which will void portions of this procedure. Therefore, this procedure is a guide for the operation of the Dose Assessment staff under the ideal conditions.

**3.0 STAFFING**

**3.1 Activation and Notification**

The Initial notification of an event comes from the Operations Duty Specialist via the Emergency Paging System (EPS) or manual callout. Additional Dose Assessor support is contacted in accordance with Appendix A. The Dose Assessor is a position required for the CECC to make Protective Action Recommendations and to meet minimum staffing levels.

Upon reporting to the CECC, perform initial activities in accordance with the checklist provided as **Appendix A**.

**3.2 Shift Change**

Shift change notification and transition and transfer of responsibilities should be conducted in accordance with the Dose Assessment Shift Change and Termination Checklist (Appendix B).

**3.3 Termination**

Termination of an event should include the following actions and follow the Dose Assessment Shift Change and Event Termination Checklist (Appendix B).

DOSE ASSESSMENT STAFF ACTIVITIES DURING NUCLEAR PLANT RADIOLOGICAL EMERGENCIES	CECC EPIP-8	Page 3 of 32 Revision 24
---	-------------	-----------------------------

#### **4.0 DOSE ASSESSOR INTERFACES**

##### **4.1 Radiological Assessment Manager / Coordinator (RAM/RAC)**

The Dose Assessor should interface directly with the Radiological Assessment Coordinator (RAC). In the absence of the RAC, communication is provided directly to the RAM. Requests for any special-case assessments should come to Dose Assessment through the RAC/RAM or be cleared by the RAC/RAM prior to their performance.

Dose Assessment is responsible for performing the offsite dose assessment activities of the CECC in order to determine Protective Action Recommendations using the appropriate appendix in CECC EPIP-1. Dose assessment results are also evaluated against criteria for declaration of Emergency Classification levels, and evaluations are communicated to the RAM/RAC.

Dose Assessment should provide results of all dose assessments and plume plots from FRED to the RAC/RAM, who will approve them and distribute them to CECC staffs. Initial dose assessments (those made at the start of an event or when the conditions have changed significantly as defined in this procedure) will receive the approval of the RAC/RAM and then are transmitted to the TSC and the State. Under most other conditions, the results are directly transmitted to the TSC and the State on the State Update form via computer spooling. However, if the computer spooling is unavailable, then the Dose Assessor shall prepare a State Update form manually as defined in EPIP-1. CECC Clerical staff have instructions for distribution.

Dose Assessment should provide to the RAC/RAM copies of plume plots from RED for ongoing releases or plots of estimated centerline location (if there is not a known release but potential exists for one to occur). This information should be transmitted by the RAC/RAM to the CECC, TSC, and State. Dose assessment will also support post event recovery efforts.

##### **4.2 Meteorologist (MET)**

The CECC Meteorologist is responsible for providing to Dose Assessment the real time and forecast meteorological data and associated advice on atmospheric dispersion and transport. If a meteorologist is not initially available for response to the CECC, support can be obtained from Muscle Shoals. Telephone and pager numbers for the Muscle Shoals response personnel are available in the REND.

Meteorological data is provided to the CECC by computer inputs and by the CECC meteorologist. In the event of a monitored airborne release, the 15-minute meteorological data is automatically accessed by the RED and FRED codes. This data should be verified against the distributed meteorological data or by the meteorologist. The meteorologist is also available to convert flow rates to exit velocities for use in the codes. The meteorologists will also provide forecast information for use in the FRED code.

##### **4.3 Environs Assessor/Field Coordinator**

Dose Assessors provide plume plots to the CECC Environs Assessor and to the Field Coordinator at the Radiological Monitoring Control Center (RMCC) via the RAC. These plume plots are used to assist with decisions on field team deployments. Real time plume plots from the RED code are to be distributed to the EA/FC and the State for that purpose.

Field data is also shared to assist with comparison of dose projections with field measurements. This comparison can assist with evaluations if field teams are at maximum centerline locations, or if reported plant release rates coincide with actual field measurements.

In the event of an unmonitored release from a site, field team data can be used in the BRED code to assist with determination of a release rate.

#### **4.4 Core Damage Assessors**

The CECC Core Damage group (in Plant Assessment) is responsible for supplying Dose Assessment with projections of potential, anticipated, and/or worst-case release rates and pathways.

#### **4.5 Technical Support Center (TSC)**

The TSC is a source of information for radioactivity release rates, pathways, flow rates, and information on plant status and prognosis. The primary point of contact is TSC Chemistry. Release information is also available via the Integrated Computer System (ISC) using the CECC computers.

#### **4.6 River Operations**

River Operations may assist in providing Dose Assessment information on water dispersion characteristics for releases to the river. This information may be used in running the WATERDOSE code, or for use of the manual methodology if the dose code is unavailable.

#### **4.7 State (Radiological)**

Dose Assessment shall ensure that communication with the State Dose Assessment Team is established and maintained. The State should be given hourly updates, as a minimum. These updates should include discussions of all technical information relative to dose assessments being made (incoming release rates, assumptions used, problems with information flow). The State should also be contacted if the conditions have changed significantly as defined in this procedure. DO NOT discuss protective action recommendations with the State.

### **5.0 PERFORMING DOSE ASSESSMENTS**

#### **5.1 Data Verification**

All dose assessment results (computer generated or hand calculated) involving data input will be verified by a second party verifier. The verifier may be a Dose Assessor or the RAM/RAC. The verifier will verify the accuracy and appropriateness of data input and reasonableness of the results. Both preparer and verifier will initial and date the results page of the assessment (e.g., State Update Form for FRED assessments).

#### **5.2 Preliminary Assessments**

Dose Assessors should provide results of all preliminary assessments to the RAC/RAM. Preliminary Assessments are provided as part of a FRED run. Preliminary assessments will be performed at the start of an event or when the conditions have changed significantly as defined in this procedure.

### **5.3 Criteria for a Significant Change in Conditions**

Criteria for a significant change which will require a new dose assessment run are:

- the release type / path has changed,
- the release rates have changed by a factor of 10
- the stability class has changed by 2 classes,
- or the wind speed has changed by a factor of 2.

### **5.4 FRED or RED Assessments - Collection of Data**

Gather information as provided on Appendix C. Sources of information may include the Technical Support Center (Chemistry), ICS, CECC Meteorologist or CECC Core Damage Assessors. Refer to Appendix C for instructions on running the dose codes.

### **5.5 Preparing a Protective Action Recommendation (PAR)**

TVA must satisfy regulatory requirements to provide State Authorities a PAR within 15 minutes of the declaration of a General Emergency. Therefore, Dose Assessors should anticipate and initiate development of a PAR to allow ample time for review, approval and transmittal to State Authorities.

A Protective Action Recommendation for airborne releases is determined based upon results of a FRED run. If the FRED program is unavailable, then the manual methodology should be utilized as provided in this procedure. A PAR form contained in CECC EPIP-1 should be completed, with attention to identification of affected sectors as page 2 of that document..

Dose Assessment should provide technical guidance to the RAC/RAM in the preparation of protective action recommendations based on dose assessments. The RAC is responsible for written preparation of recommendations to the RAM.

### **5.6 Changes in Conditions for a PAR**

Changes to a PAR must be communicated to the State by the CECC Director within 15 minutes of determination. Criteria for a changes which will require evaluation a new PAR are:

- the release type / path has changed,
- the release rates have changed by a factor of 10
- the stability class has changed by 2 classes,
- or the wind speed has changed by a factor of 2.
- a wind direction change resulting in a change of an affected sector

### **5.7 BRED Assessment - Back Calculation of Release Rate from Measured Field Data**

Measured field data (consisting of dose rates in mrem/hr and I-131/H-3 concentrations) are assessed in several ways. If there is a monitored release ongoing, the field data are compared to the results of the most applicable data produced by the RED or FRED computer models.

However, in cases where the release is unknown or questionable, the field data are then input into the BRED computer model to determine the applicable release rates. These calculated release rates are then input into the RED/FRED codes, as applicable, which can be used to perform dose assessments and any applicable Protective Action Recommendation (PAR).

**5.8 Comparison of Measured Field Data to Dose Projections**

Field data is compared with dose projections to assist with evaluations if field teams are at maximum centerline locations, or if reported plant release rates coincide with actual field measurements. Appendix G is provided as a reference to perform comparisons.

**5.9 WATERDOSE Assessments**

Liquid releases to the River are assessed using the WATER DOSE code as provided on Appendix H. If the WATER DOSE code is unavailable, a manual methodology is provided as Appendix I.

**5.10 Manual Methodologies for Dose Assessments**

In the event that the FRED, RED or WATERDOSE computer codes are unavailable, instructions are provided in the Appendixes of this procedure for manual calculation methods. In consideration that the computer programs also normally spool data outputs directly to the State, the Dose Assessor will need to ensure that the applicable pages of the State Update Form, contained in CECC EPIP-1, are also manually completed and transmitted accordingly.

Dose Assessor Initial Reporting Checklist

(steps do not need to be performed in sequential order)

1. **SIGN IN** on the CECC staffing board and don your CECC position tag.
2. **START** logkeeping of key activities and notifications in the position logbook.
3. **ENSURE** that the following support staffs are notified and/or staffed. Refer to the REND call out list for contact information.
  - Second Dose Assessor, if needed.
  - Muscle Shoals Meteorologist (if serving as CECC pager duty person).
4. **CONFIRM** position notebook procedures match revision levels in controlled copies.
5. **ESTABLISH** contact with the TSC Chemistry (programmed on phone and in REND section B). Ascertain if a release has been, or is occurring. **IF YES, INITIATE** a dose assessment as noted below.
6. Perform preliminary assessments and dose projections.
7. **ESTABLISH** initial contact with the State Radiological Dose Assessment staff (programmed on phone and in REND section B).
8. **OBTAIN** a briefing from the RAC/RAM and **INFORM** the RAC/RAM when the activities above are completed. Report/request if a radiological release has been, or is occurring.

**NOTES:** **COMPARE** dose assessment results against the levels for the declared REP class and advise the RAC/RAM to advise the TSC if an upgrade is indicated.

For Preliminary Assessments and Dose Projections use the **FRED** Code (Appendix C and D).

For Plume Plots to track actual releases in current time, use the **RED** Code (Appendix C and D).

When the plant release rate is unmonitored or questionable, use the **BRED** code to arrive at a plant release rate based upon Field Team data. (Appendix E).

For releases to the River, use the **WATERDOSE** Code (Appendix H)

**If computer problems are encountered, immediately contact Computer Support**

If the FRED computer code is inoperative, use the **MANUAL METHODOLOGY** to assess airborne radioactivity releases (Appendix F).

If the WATERDOSE computer code is inoperative, use the **MANUAL METHODOLOGY** to assess liquid releases to the river (Appendix I and J).

**APPENDIX B**

**Dose Assessor Shift Change and Termination Checklist**

**1. The following should be discussed between staff for Shift Turnover.**

- Current release data and projections.
- Current met data and projections.
- Current plant status and projections.
- Current environs data and projections.
- Pertinent historical data/plant conditions
- Status of any Protective Action Recommendations made and the rationale for these
- Status of any (incoming or outgoing) unfulfilled requests for information.
- Dose methodologies being used.
- Identification of problems in response capability.
- Identification of contacts at the TSC, State, Core Damage staff and RO
- Time for next periodic update to the State
- Time for next periodic update of the RED plume plot
- Identify individuals external to CECC who were activated or placed on standby

**2. Transfer of Shift Change Responsibility**

- Obtain approval from the RAC for the transfer of responsibility
- The on duty Dose Assessment Staff should remain available or at least respond in case transfer problems are identified

**3. Termination**

- Log off CECC computer system/turn off plotters.
- Notify all on-call staff of event termination, such as:
  - Meteorologist (if staffed in Muscle Shoals)
  - Additional Dose Assessment staff on standby
  - River Operations
- Collect and turn in all records to the EP staff

Code Runs

## FRED or RED Assessment of Airborne Releases

1. **DOUBLE CLICK** on the "CECC VAX" icon if the VAX User Window is not displayed on computer screen. Depress **[RETURN]** until prompted for the user name.
2. **ENTER** user name and password: ☐ **RED** and CECC or ☐ **FRED** and CECC
3. **FOLLOW** computer prompts to begin or exit program.

**NOTE:** TYPE CTRL Z any time to exit or re-start program.

When executing the RED code you will be asked whether this is a "new run." **ANSWER "Y"** and **ENTER "NEW RUN,"** unless you desire to modify or append to a current run.

4. **INPUT** data as collected on Appendix C.

For a user-specified release (for noble gas and/or tritium releases only), **ENTER** the nuclide number below (as applicable) and the associated nuclide-specific release rates.

Nuclide #	Nuclide	Nuclide #	Nuclide
1	H-3	28	XE-131M
6	KR-85	29	XE-133
7	KR-85M	30	XE-133M
8	KR-87	31	XE-135
9	KR-88	32	XE-138

5. **CONFIRM** whether the release rate data is correct, (Y/N). Edit as necessary.
6. **CONFIRM** whether the calculated release rate data is correct, (Y/N). Edit as necessary.
7. **RUN** the code for the expected event duration:
  - For FRED Preliminary Assessments use 1 hour;
  - For FRED Dose Projections use a 4-hour duration unless known otherwise.
  - For RED assessments run once per 15-min during ongoing releases.

FRED or RED Assessment of Airborne Releases

8. **OBTAIN** code outputs by as follows:
  - a. **ANSWER** "Y" to the prompt to "Print dose charts or plume plots."
  - b. **SELECT** State Update Form (SUF) and plume plot as minimum outputs
  - c. **SELECT** scale to be used:  
[1] for 10 mile, [2] for 50 mile, [3] to exit code or go to next time segment)
  - d. For plume plot, **CLICK** print button at bottom of screen to perform a screen print of plot. Be sure that the pop-up dialog box has the Graphic Image set to "Swap Black/White."
  - e. For Preliminary Assessments, **OBTAIN** the Protective Action Guide (PAG) release rates from the FRED output and the actual/projected release rates from the State Update Form.
  - f. The Preparer and Verifier shall **INITIAL** and **DATE** the results.
9. **COMPARE** the declared REP class with that indicated in the FRED output. Notify the RAC/RAM (to advise the TSC) of the need for REP class changes based on radiological conditions.
10. **GIVE** PAG and actual/projected release rates to the Board Writer.
11. **GIVE** the FRED results (SUF, PAG Release Rates, plume plot, and REP class information) to the RAC for distribution. (The SUF may be sent directly through the computer to the State and the TSC.)
12. At the request of the RAC/RAM, **PREPARE** a PAR using the CECC Protective Action Logic Diagram and the PAR form found in EPIP-7 and give to the RAM with the results of the FRED run.
13. **REQUEST** that the RAC distribute the SUF, and any plume plots to all standard distribution locations, via CECC Clerical instructions.
14. Preferably once every 15-min (at least once per hour) during an actual release,
  - a. **ENTER** the release data into the RED code for use in tracking the plume
  - b. **COMPARE** the estimated impacts to measured field data.
  - c. **GIVE** the results (plume plot only) to the RAC for distribution to the CECC, the State, and the TSC.
15. **TYPE** CTRL Z any time to exit or re-start program.

## \*NOTE:

- For a TPBAR handling accident, the H-3 release can be estimated as:

$$\text{H-3 Release Rate} = \frac{\mu\text{Ci/cc H-3}}{60 \text{ min/sec}} \times \text{cfm} \times 28320 \text{ cc/cf}$$

$$\{ \text{H-3 release } (\mu\text{Ci/s}) = \# \mu\text{Ci/cc H-3} \times \text{building exhaust flow rate (cfm)} \times 28320 \text{ cc/cf} \times 1/60 \text{ min/s} \}$$

- For a WGD T Rupture accident, the default H-3 release is 2500 Ci over one hr or 6.94E+05  $\mu\text{Ci/s}$  for 1 hr

7. IF tritium accident also involves noble gases, THEN CALCULATE Total TEDE rate as follows:
