

CABLE FIRE AT BROWNS FERRY NUCLEAR POWER STATION

The review by the NRC of the consequences of the fire at the Browns Ferry Nuclear Power Station is continuing. Reports of fire protection inspections performed by groups or organizations other than the NRC and actions taken or planned by licensees as a result of these other fire protection inspections will be of particular value in this continuing review of the status of operating plants and determination of any actions which may be appropriate.

ACTIONS TO BE TAKEN BY LICENSEES:

1. If fire protection inspections (other than those performed by NRC) have been made at your licensed operating facilities since March 22, 1975, please forward to this office, within 30 days:
 - a. A copy of all reports or any other documentation relating to the fire protection inspections, dates of inspections and by whom performed.
 - b. A description of any actions taken or planned - showing dates for actions - as a result of findings or recommendations from the fire protection inspections or, if appropriate, your position relative to the results of the inspections performed.
2. If no fire protection inspections (other than those performed by NRC) have been performed at your licensed operating facilities since March 22, 1975, please forward to this office:
 - a. Within 15 days, your plans and schedules for the performance of fire protection inspections at your licensed operating facilities within the next year.
 - b. Within 30 days following completion of each of the inspections planned (Item 2.a. above), (1) a copy of all reports or other documentation relating to each fire protection inspection, dates of inspections and by whom performed, and (2) a description of actions taken or planned - showing dates for actions - as a result of findings or recommendations from the inspections or, if appropriate, your position relative to the results of the inspections performed.
3. Provide directly to the Director, Division of Reactor Inspection Programs, NRC, Washington, D. C. 20555, a copy of all information submitted in response to this Bulletin.
