Mr. Paul D. Watts  
Quality Assurance Manager  
Ranor, Inc.  
One Bella Drive  
Westminster MA 01473

SUBJECT: REQUEST FOR QUALITY ASSURANCE PROGRAM REVIEW AND  
APPROVAL

Dear Mr. Watts:

This is in response to your letter dated May 24, 2002, regarding your request for the Nuclear Regulatory Commission (NRC) to review and approve your quality assurance (QA) program in accordance with 10 CFR Part 71. The NRC currently reviews QA programs only for licensees and applicants for Certificates of Compliance (CoCs). Although a small number of Part 71 QA program approvals were previously issued to fabricator entities, this practice has been discontinued. We regret the delay in responding to your request.

Please note that Part 71 has no requirement or provision for NRC approval of fabricator QA programs. The only QA program approvals required by Part 71 are for licensees and applicants for CoCs. Fabrication activities for NRC-certified packagings must be performed in accordance with a CoC holder's QA program.

The application fee you provided with your submittal will be returned under separate cover. If you have any questions or wish to have your application package returned, please contact Jim Pearson at 301-415-1985.

Sincerely,

/RA/  
E. William Brach, Director  
Spent Fuel Project Office  
Office of Nuclear Material Safety  
and Safeguards
