OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary, U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Secretary,

We are very disturbed to read that your agency is preparing to change your rules and allow massive quantities of nuclear wastes to be released into unlicensed landfills, incinerators and consumer products. You are ignoring recommendations from a report you commissioned.

Please do not put our children and grandchildren in jeopardy to save money. We have billions of dollars to rebuild Iraq - but not enough money to safeguard our own people. This is wrong! Do what you are supposed to do regulate !!
