

March 7, 2003

MEMORANDUM TO: Lynn Scattolini, Director
Office of the Chief Information Officer
Information Management Division

FROM Janet R. Schlueter, Chief **/RA/**
High-Level Waste Branch
Division of Waste Management
Office of Nuclear Material Safety
and Safeguards

SUBJECT: NMSS BUSINESS REQUIREMENTS FOR POTENTIAL YUCCA
MOUNTAIN LICENSE APPLICATION

It is expected that the U.S. Department of Energy (DOE) will submit a License Application (LA) for construction of a first of its kind High-Level Waste Geological Repository. The U.S. Nuclear Regulatory Commission (NRC) and specifically the Office of Nuclear Material Safety and Safeguards (NMSS) has the task to evaluate any potential LA that DOE submits. The NRC will conduct an acceptance review of the LA for docketing in 90 days. Additionally, NRC staff will have approximately 18 months to review the LA and write a safety evaluation report.

The attachment specifies the changes we request be included in the Final Electronic Maintenance Rule. The changes address the numbers and format of the potential LA. Addressed changes to Part 63 were submitted separately to the Office of the Chief Information Officer.

NMSS is also requiring the capability for print on demand (we have many more staff than requested copies).

Attachment: Part 63 Changes for Final E-Rule

§ 63.22 Filing and distribution of application

* * * * *

(Note: 63.22(a), (c) and (d) were not modified in the proposed e-rule, but are added, and modified, for the final rule.)

(a) An application for a license to receive and possess source, special nuclear, or byproduct material at a geologic repository operations area at the Yucca Mountain site that has been characterized, any amendments to the application, and an accompanying environmental impact statement and any supplements, must be signed by the Secretary of Energy or the Secretary's authorized representative and must be filed ~~in triplicate~~ with the Director: *in triplicate on paper and optical storage media.*

(b) DOE shall submit 30 additional copies in paper form and optical storage media of each portion of the application and any amendments, and each environmental impact statement and any supplements. DOE shall maintain the capability to generate additional copies for distribution in accordance with written instructions from the Director or the Director's designee.

(c) * * *

(d) When an application, and any amendment to it is filed, paper and optical storage media copies must be made available in appropriate locations near the proposed geologic repository operations area at the Yucca Mountain site for inspection by the public. These copies must be updated as amendments to the application are made. The environmental impact statement and any supplements to it must be made available in the same manner. An updated copy of the application, and the environmental impact statement and supplements, must be produced at any public hearing held by the Commission on the application for use by any party to the proceeding.
