Subject: WCAP-16011 Acceptance for Review

Security Level:? Internal
Hi Brian,

WCAP-16011, "Startup Test Activity Reduction Program" was submitted for staff review on March 31, 2003 via letter WOG-03-198.

Any word from the reviewers on status of the acceptance letter?
Can you guesstimate its issuance schedule?

Reason for this request is to allow planning for a kick-off meeting with the staff reviewer(s).
We're under a tight schedule and want to help wherever possible to expedite...

Regards, Virgil

Virgil,

I don't have a good answer for you, but:

Any word from the reviewers on status of the acceptance letter? I talked to the reviewers, and there seems to be quite a bit of apprehension about doing what you are proposing. They are still discussing what to do with this review.

Can you guesstimate its issuance schedule? No, not yet.

Reason for this request is to allow planning for a kick-off meeting with the staff reviewer(s). I totally agree. I would like to get more word from the tech staff before I try and schedule anything - to at least give you an idea about what to focus on at a meeting. I don't see any problem with starting some scheduling. Do you have a month/day in mind? I need roughly 2 weeks heads up to notice a meeting.

I'll need: a date, potetial reviews from both sides (if known), and an agenda with some detail. Right now I have only the reactor systems branch involved.

Brian
