

Department of Energy
Washington, DC 20585

August 15, 1991

Mr. John J. Linehan, Acting Director
Repository Licensing and Quality
Assurance Project Directorate
Division of High-Level Waste Management
Office of Nuclear Material Safety
and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Linehan:

By U.S. Department of Energy (DOE) letter of August 1, 1991, a copy of the Raytheon Services Nevada (RSN) Quality Assurance Program Description (QAPD) for the Yucca Mountain Site Characterization Project, Revision 0, was transmitted to you as an enclosure. This is to confirm, per phone conversation between Ken Hooks of your staff and me, on August 12, 1991, that you received a complete copy of the RSN QAPD by that letter. One of the parties on our distribution list notified us that they did not receive a complete copy of this document. Since you have a complete copy of the enclosure, we will not transmit it to you again in this letter; however, we are transmitting complete copies to all those on the distribution list to ensure that everyone gets them. If you have any questions, please give me a call at (202) 586-1462.

Sincerely,

Linda Desell, Acting Chief
Regulatory Integration Branch
Office of Civilian Radioactive
Waste Management
