Subject: oppose deregulation of nuclear waste

May 13, 2003 (2:00PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

To the Nuclear Regulatroy Commission:

Please DO NOT deregulate nuclear waste. The American people need to know that the toys their children play with and the appliances they handle are not invisible and insidious hazards to their health. However much the nuclear industry protests that low level radiation is not a health hazard, its motives are suspect. Nuclear profiteers do not want the expense of putting the poisons they have produced out of harm's way, and the fact that they would promote using these poisons for profit to the detriment of public health is absolutely incredible and a testament to the total irresponsibility of that industry. You know have the opportunity to demonstrate that you are not in the pockets of the profiteers you are supposed to be regulating by refusing to deregulate nuclear waste. Please keep radiation out of our homes.

Sincerely,
Marilyn Hoff
