Ms. Adelaide S. Giantelli
Project Manager
Spent Fuel Project Office – NMSS
U.S. Nuclear Regulatory Commission
One White Flint North
1155 Rockville Pike
Rockville, MD 20852-2738

Dear Ms. Giantelli:

Subject: Certificate of Compliance No. 6581 Amendment Request for the Model 51032-1 Package (Revision 7A of EMF-52)

Ref.: 1. Letter, James K. Davis to John D. Monninger, same subject, dated January 20, 2003.

Ref.: 2. Letter, Adelaide S. Giantelli to James K. Davis, Certificate of Compliance No. 6581 for the Model No. 51032-1 Package - Request for Additional Information, dated April 17, 2003.

Reference 2 requests additional information needed by the NRC in order to review Revision 7 of EMF-52, which was submitted with Reference 1. The appropriate pages of EMF-52 have been revised as Revision 7A to address the additional information requests. Included with this letter are six copies of the pages that comprise revision 7A. The following pages should be replaced in or added to Revision 7 of EMF-52: the cover page and spine, the title page, signature page, (add) Nature of Changes for Revision 7A, Contents (pages iv & v), Figures (page vii), Tables (page viii), pages 2-1 to 2-4, pages 2-9 to 2-18 (pages 2-17 and 2-18 are new), pages 10-1 to 10-8, pages 11-1 and 11-2, page 12-1, and the Distribution page.

The changes and additions are described and justified in the Nature of Changes page for Revision 7A and are summarized as follows. The size of the license drawings has been increased to 11" X 17" (pages 12-12 to 2-18). The isometric view was added back in as Figure 2.1 and the other Figures renumbered to match Table 2.1. The drawing references in the text were corrected as needed. The drawing reference to Figure 2.6 was changed to drawing EMF-300,607 R/3 which does show how the assemblies are restrained. The evaluation of the center thrust bracket already exists in Appendix III. A reference to Appendix III was added to page 2-2, along with additional justification for use of the center thrust bracket. Table 2.6 was added to summarize all of the allowable contents of the package in one place. The bundle weight information requested for Chapter 10 was placed in Table 2.6, where it seemed more appropriate. The mass data given in section 10.1.4.1 was corrected. The reference to Fissile Class I on page 11-1 was changed to fissile. Reference 4 on page 12-1 was corrected.
