NUREG/CR-6144, Vol 1, Vol 2 Part 1a, and Vol 2 part 1b were reviewed for sensitivity and determined to be ok for public release.

The study develops a method to estimate the risk of core damage during mid-loop operation. This is not specific enough* to be of use to a terrorist.

*No plant layout drawings

The NUREGS are available for pickup in O 5-E7
