No, I haven't get this NUREG. Is it a new publication? When did you send it out for the Sensitive Information review?

Paula/Tom/Ray,

Back in late November or early December Elaine Morris in the Publishing Services Branch (now retired) told me that the subject NUREG/CR, which was ready to be sent to the printer, had been signed off (on the Form 426a) by Brenda Shelton and sent to Les Barnett for a Sensitive Information check. This report really needs to be issued and I am trying to track it down. **Can any of you help me find it?** Paula, if you guys still have the camera-ready copy and/or CD, perhaps you could send another copy to Les/Tom so they can send it to our safeguards folks. Ray, have you gotten it yet? The report, prepared by INEEL, compares treatment practices applied to safety-related equipment to those applied to commercial-grade equipment. It doesn't involve any safeguards or sensitive information. Thanks for your help,
Dave (415-2728)
