Re: Request for Information regarding Historic and Cultural Resources at the
Ambrosia Lake Uranium Mill Facility.

Dear Ms. Frant:

We received the above referenced request on May 2, 2003. Thank you for providing the Historic Preservation Division with this information. Unfortunately, there is not yet enough information for us to determine impacts to known or unknown historic properties in the area. We are requesting additional information before we can proceed with our Section 106 review under the National Historic Preservation Act. Please see the attached "Standard Information Needed for Section 106 Consultation".

We will need the exact location of the proposed construction areas plotted on 7.5-minute USGS maps, with the complete legal descriptions (USGS quadrangle name, township, range, and section or UTM coordinates for unplatted parcels), so we can better evaluate their impact on historic properties.

In addition, there are known archaeological sites in the vicinity of your proposed project area, and the area of potential affect (APE) appears to have NOT been surveyed for archaeological and cultural resources. If you are aware of an archaeological/cultural resources survey that has covered these areas within the past 10-15 years we will be happy to review it. Since the proposed project appears to have a potential for unknown cultural resources to be present, we recommend that a cultural resource professional conduct a literature search to see if this particular space has been recently surveyed. If it has not, it will need a pedestrian archaeological and cultural resource survey at the proposed project area. If you need our assistance in contacting a professional archaeologist a list can be found on the Historic Preservation Division web site at <http://museums.state.nm.us/hpd/>.

Docket to
40-8905

NM5501

We will also need additional information regarding the buildings and structures that are being proposed for demolition. Potential historic buildings should be documented on Historic Cultural Properties Inventory forms also available at our web site.

Consultation with Native American groups on a government-to-government basis is also required for these projects pursuant to the revised 36 CFR 800 regulations issued by the Advisory Council for Historic Preservation. **Consultation with tribes needs to occur regardless of whether the proposed undertaking is located within an Indian Reservation or Pueblo boundaries to ensure that no traditional cultural properties are affected.** There are 22 federally recognized tribes in the state and we have enclosed a list of these tribes for your reference on future projects. It is not necessary to contact all 22 tribes, but it is imperative that you make a good faith effort to identify those tribes who may have an interest in the area of your projects. The tribes that have indicated an interest in projects in this area are included on an enclosed list. We have also enclosed a list of tribal officials to assist you with your consultations.

If you have any questions concerning these comments, please contact Jim Hare at (505) 827-7411 (jhare@oca.state.nm.us), or Phil Young at 827-6314 (pyoung@oca.state.nm.us).

Sincerely,

Augustine Duncan

Standard Information Needed for Section 106 Consultation

- Detailed description of the proposed project, including related activities to be carried out in conjunction with the project *and* the land status of real property in the area of effect. This description should explain the scope of work. Preliminary drawings or plans of the project design on USGS and/or other appropriate map should be included.
- Descriptions of the size of the project area, terrain, and present land uses of the project and adjacent land. Current photographs (originals) of the land to be used for the proposed project are helpful. Any additional information on kind and degree of prior or existing surface disturbance should also be included.
- A portion of the U.S. Geological Survey 7.5 quadrangle map with the project area clearly marked on it. The name of the quadrangle, and the Township, Range, and Section of the project area must be included with the map (or displayed on it). A legible photocopy of the portion of the quad in which the project area appears is fine, as long as the name of the quad and the other locational information are provided with the map.
- A *written* description of the proposed boundaries of the project's Area of Potential Effects (APE). This should also be marked on the map, if the APE does not coincide with the project area (if, for example, effects extend beyond the area of ground disturbance).
- A detailed description of efforts that are being made or on-going in order to identify and evaluate properties (including historic structures and archaeological sites) in the APE that are listed on or eligible to the National Register of Historic Places (and the NM State Register of Cultural Properties). Results from these efforts must be provided to this office before a determination of effect can be made. Any archaeological sites, historic buildings, or other cultural resources identified in the general area must be noted.
- A description of efforts to identify whether Native American tribes, that may be culturally affiliated with traditional cultural properties or other kinds of sites within the APE, have any concerns related to the proposed undertaking.
- Identification of the funding source: federal, state, state trust, private, a combination?

For historic building rehabilitation, accessibility improvements, demolition, or construction also include:

- Approximate construction dates for buildings or structures in the Area of Potential Effect.
- Current photographs (originals) of any building(s) or structure(s) to be affected by the project. Overall exterior photos are sufficient. Photos need to be clear enough for HPD staff to evaluate the historic integrity of the building(s).
- Project location clearly marked on a street map within a municipality, or, if it will occur in a rural location, the USGS quadrangle map as described above.
- Preliminary drawings or plans of the project design on topo and/or street map as appropriate.

Allow 30 days for HPD review as per 36 CFR 800.3(c)(4), 800.4(d)(1), 800.5(c), and 800.11

Useful information, including lists of cultural properties on the national and state registers, can be obtained from our web site: <http://museums.state.nm.us/hpd/>

How to Compile the Requested Information

The locational information is requested to help us determine whether any previous archaeological survey or historic structure documentation has been conducted in the APE. Commonly, agencies and organizations preparing for an undertaking of this nature contact environmental or cultural resources consulting firms to determine the status of cultural property inventory in a given APE, complete an archaeological and/or historic structure survey if none has been performed, and assist an agency in deciding which, if any, Native American tribes should be consulted. A list of permitted archaeologists and archaeological firms is available from this office upon request or can be downloaded from our web site (<http://museums.state.nm.us/hpd/>). The cultural resources specialist will write a report of the survey results and recommendations and submit it to your office. Please send us the report for review and consultation regarding any historic properties that might be found during the survey and any effects of the proposed project upon them. The report should be accompanied by a cover letter requesting a formal determination of effect for the undertaking.

Please note that, pursuant to the revised 36 CFR 800 guidelines issued by the Advisory Council for Historic Preservation, Native American tribes that may be culturally affiliated with traditional cultural properties (and other historic properties) in the area of effect must be consulted prior to the beginning of project work. This is true even if the area of effect does not lie within the boundaries of an Indian Reservation; neighboring tribes may have concerns. In order to accomplish this consultation it is not necessary to contact every tribe in New Mexico, but you must make a good faith effort to identify tribes that may have issues in the area of effect and ensure that they are consulted. Some tribes may not wish to provide sensitive information to a consulting firm or local government agency. In these cases, tribes may wish to request that the federal agency be involved, or they may contact our office directly with their concerns. If you need further information about how such consultation should proceed, please contact this office. Staff at the federal offices that are helping you complete your funding application can also provide guidance and assistance regarding tribal consultation. The federal agency that you are working with can also provide the letter that authorizes you to initiate the consultation.

Native American Consultations
New Mexico Historic Preservation Division (HPD)

(NOTE: This is a county-by-county working list for determining which Native American Indian tribes want to be consulted for proposed projects in various geographic parts of New Mexico. It has been generated from a HPD ethnographic study, the National Park Service's Native American Consultation Database, and tribes telling us they wish to be consulted for at least "certain projects" in that specific county. We are always in the process of updating and refining consultative efforts. It is NOT a definitive list, and may change depending on the type and location of the proposed project. We have been working with agencies, Native American Indian tribes, and The Advisory Council on Historic Preservation to develop a GIS based map resource system. Tribes wishing to amend or change their areas of geographic interest should contact the HPD at 228 E. Palace Ave., Room 320, Santa Fe, NM 87501; 505-827-6320; fax 505-827-6338)
