SUBJECT: FINAL SUPPLEMENT 11 TO THE GENERIC ENVIRONMENTAL IMPACT  
STATEMENT (GEIS) REGARDING LICENSE RENEWAL FOR ST. LUCIE,  
UNITS 1 AND 2

Dear Mr. Stall:

The U.S. Nuclear Regulatory Commission (NRC) staff has completed the plant-specific Supplement 11 to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Power Plants," (GEIS). Supplement 11 addresses the renewal of operating licenses DPR-67 and NPF-16 for St. Lucie, Units 1 and 2, for an additional 20 years of operation. St. Lucie is operated by Florida Power and Light Company (FPL). Enclosed is a copy of the report.

As discussed in Section 9.3 of this report:

Based on (1) the analysis and findings in the GEIS (NRC 1996, 1999); (2) the ER submitted by FPL (FPL 2001b); (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for St. Lucie Units 1 and 2 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable.

A notice of filing of the final environmental impact statement will be placed in the *Federal Register* through the U.S. Environmental Protection Agency in May 2003. If you have any questions regarding this matter, please call me at 301-415-1191.

Sincerely,  
**/RAI**
