1.0 SCOPE

This limited scope audit will evaluate the Los Alamos National Laboratory (Los Alamos) Quality Assurance (QA) program to determine whether it meets the requirements and commitments imposed by the Office of Civilian Radioactive Waste Management (OCRWM). This will be done by verifying implementation and effectiveness of the system in place, as well as verifying compliance with requirements.

A representative sample of discrepancies identified during previous QA audits and surveillances of Los Alamos will be included in the scope of this audit to determine the effectiveness of Los Alamos corrective actions. The status of corrective action implementation concerning open Corrective Action Requests will also be reviewed.

The programmatic elements and technical areas to be audited, as well as those programmatic elements not included in this audit, are identified in Section 4.0 of this plan.
