Kennett Square, PA 19348

Ref.: Scott County, Iowa Site File Search No. 2002101

Dear William:

I have conducted a search of the Iowa Site File for archaeological sites recorded within a one-mile radius of the project area described in your request for search on 3/11/02. This area is within Eldridge, McCausland, and Cordova quadrangle map areas as indicated on the following map. Our records indicate that One archaeological site has been reported to the OSA within the project location. Thirty three other sites were recorded within one mile of that location at the time of the site records search. Other archaeological sites may be present at or near the project location but have not been discovered or reported to the OSA. A summary of site information is included with this letter.

If you have not already done so, you may wish to consult with the State Historic Preservation Office (SHPO) to determine whether an archaeological survey may be needed. In the event that previously unidentified archaeological resources are discovered during ground disturbing activities on projects complying with Section 106 of the National Historic Preservation Act or other applicable federal and state laws, construction work should cease in the area of the resource and in the surrounding area where further subsurface remains can reasonably be expected to occur. The responsible federal or state agency and State Historic Preservation Office should be immediately notified and consulted about the discovery.

If during the course of construction or earthmoving signs of a human burial are encountered, those activities should be stopped at once and the Office of the State Archaeologist should be contacted immediately. Human burials may potentially include bone, ashes, or subterranean structures with or without overlying mound structures. All human burials in the state of Iowa are legally protected under Chapters 263B, 566, and 716 of the Iowa Code.

Should you need more information about a particular site, you may write to me indicating the appropriate site number in your request. Since every county has a different series of site numbers, be sure to include the full trinomial site designation in your request. This designation takes the form of 13XY####, where XY is the county abbreviation and #### is the order in which site reports are received for a given county.

The information in this letter is intended to assist you in fulfilling any local, state, or federal laws and regulations related to archaeological sites concerning historic preservation such as Section 106 of the National Historic Preservation Act and to assist avoidance of any burial sites potentially located within the subject area. Prior to any federal undertaking, all archaeological sites should be evaluated for their National Register eligibility. Federal undertakings include but are not limited to projects receiving any federal financial support, technical assistance, licenses, or permits received by private landowners or federal, state, or local governments. The State Historic Preservation Officer (SHPO) would need to be contacted for details about the final determination of significance for any site to be affected by a federal undertaking. This letter is not meant to confirm or deny that any applicable requirements have been met.

Sincerely,

Colleen Eck
Site Records Manager
