SUBJECT: CENCR-OD-S-297290

Ms. Mary F. O'Toole
Environmental Services Manager
Commonwealth Edison Company
Post Office Box 767
Chicago, Illinois 60690-0767

Dear Ms. O'Toole:

We are enclosing a Department of the Army permit authorizing work in conjunction with maintenance dredging at the Quad Cities Nuclear Generating Station in Cordova, Rock Island County, Illinois; approximate Mississippi River mile 506.7.

Please post the enclosed "Notice of Authorization" (yellow card) conspicuously at the project site.

If you find it necessary to make changes in this authorization, you must submit revised plans to this office for approval before beginning work. You should also have all required Federal, state, and local approvals prior to commencing work.

Please notify this office prior to starting and completion of work. A representative of this office will make periodic inspections of the work.

We appreciate your cooperation.

Should you have any questions pertaining to your permit, please contact our Regulatory Functions Branch by letter, or telephone Mr. Gary Meeker, 309/794-5651.

Sincerely,

Raymond J. Horton P.E.
James H. Blanchar, P.E.
Chief, Operations Division

United States Army Corps of Engineers

April 14 1995

A permit to perform maintenance dredging

at Rock Island County, IL, Approximate river mile, Mississippi 506.7

has been issued to Commonwealth Edison Co on April 14 19 95

Address of Permittee P.O. Box 767, Chicago, IL 60690-0767

Permit Number

CENCR-OD-S-297290

for the District Commander

DEPARTMENT OF THE ARMY PERMIT

Permit Number: CENCR-OD-S-297290

Section: 10/404

Permittee: Commonwealth Edison Company
22710 - 206th Avenue North
Cordova, Illinois 61242-9746

POC: Mary O'Toole
Tel: 312-394-4430

POC: Larry LeJeone
Tel: 309-654-2241
ext 2867

Effective Date: April 14, 1995

Expiration Date: December 31, 2004

Issuing Office: U.S. Army Corps of Engineers, Rock Island District
Clock Tower Building - P.O. Box 2004
Rock Island, Illinois 61204-2004

You are authorized to perform work in accordance with the terms and conditions specified below.

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

Project Description: To hydraulically dredge accumulated silt out of power generating station's existing intake forebay, as well as 130 feet out in front of the forebay, down to an approximate elevation of 557.0 feet, mean sea level. Approximately 750 cubic yards of material will be removed. The dredged material will be placed into an existing two-stage detention basin located on station property. This detention basin presently has sufficient available capacity to hold the dredged material expected during the proposed operation. The dredged material will remain in this area until the water evaporates or filters away naturally. Expected dredging frequency is once each five years.

Project Location: Sections 7 and 8, Township 20 North, Range 2 East of the Fourth Principal Meridian; Cordova, Rock Island County, Illinois; approximate Mississippi River mile 506.7.

in accordance with the plans and drawings attached hereto which are incorporated in and made a part of this permit.

Drawings No. 297290. Sheet 1 of 2, Vicinity Map
Sheet 2 of 2, Existing Dredged Material Placement Site

Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on the date specified on page 1. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before that date is reached.
2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party, in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archaeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.
5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions. (Condition is not applicable for Section 10 Permits.)
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. You must advise this office in writing at least two weeks before you start maintenance dredging activities under the authority of this permit. Notification shall include the method of dredging, the estimated quantity of material to be dredged, the location of the spoil site for the dredged material, and pertinent details concerning the method of spoiling, spoil site preparation, etc. The periodic maintenance dredging portion of the project may be performed under this permit until December 31, 2004.
2. That conditions 1 through 6 listed in the attached letter from the Illinois Environmental Protection Agency, Log #C-284-95 dated March 15, 1995, are considered to be part of this permit.

Further Information:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

(X) Section 10 of the Rivers and Harbors Act of 1899
(33 U.S.C. 403).

(X) Section 404 of the Clean Water Act (33 U.S.C. 1344).

() Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 U.S.C. 1413).

2. Limits of this authorization.

a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.

b. This permit does not grant any property rights or exclusive privileges.

c. This permit does not authorize any injury to the property or rights of others.

d. This permit does not authorize interference with any existing or proposed Federal project.

3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.

b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

d. Design or construction deficiencies associated with the permitted work.

e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. Reliance on Applicant's Data: The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. Reevaluation of Permit Decision. This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

a. You fail to comply with the terms and conditions of this permit.

b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (See 4 above).

c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Extensions. General condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.

Your signature below, as permittee, indicates that you accept and agree to comply with the terms and conditions of this permit.

Mary F. O'Toole 4-10-95
Permittee Date

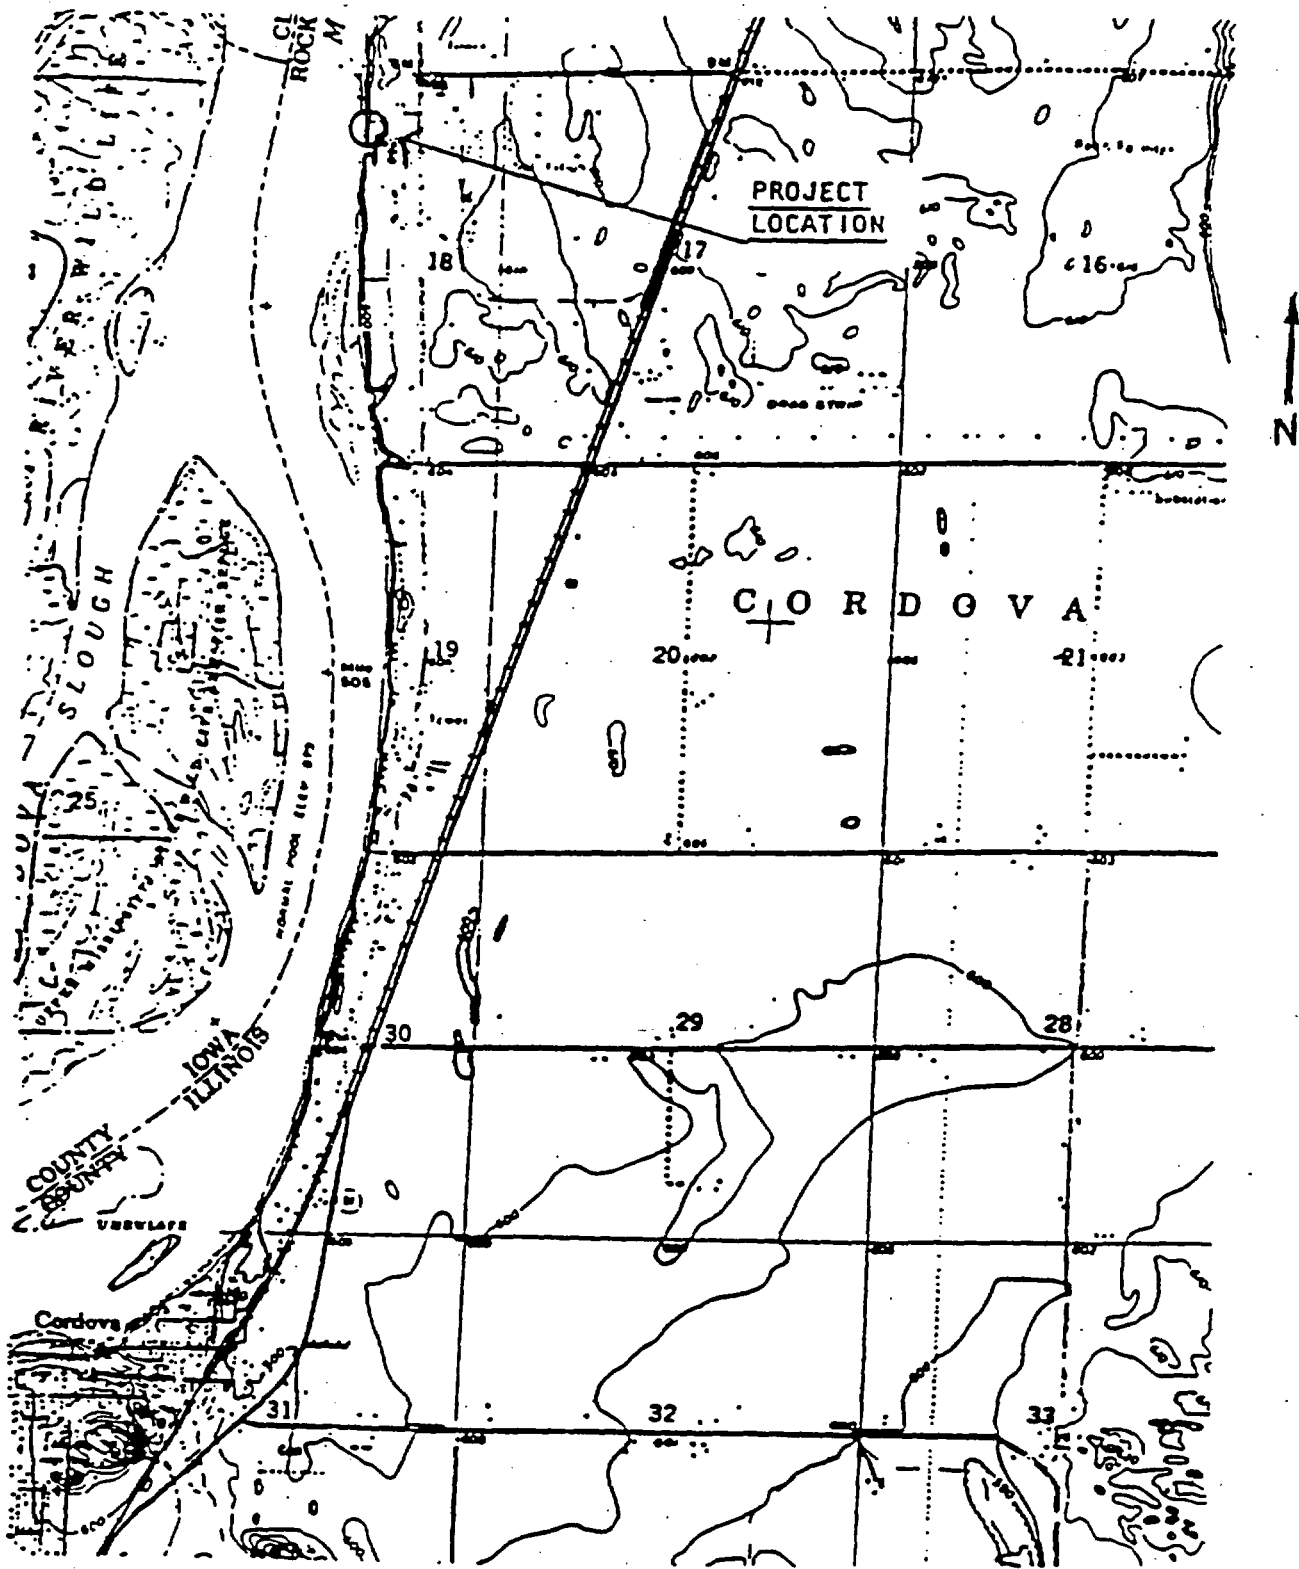

This permit be effective when the Federal official, designated to act for the Secretary of the Army, has signed below.

Raymond D. Horton P.E. 4-14-95
Charles S. Cox
Colonel, U.S. Army
District Engineer
Date

When the structures or work authorized by this permit are still in existence at the time the property is transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the associated liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.

Re: Commonwealth Edison Company (Rock Island County)
Dredge forebay-Mississippi River
Log # C-284-95 [CoE appl.# 297290]

Gentlemen:

This Agency received a request on January 25, 1995 from the Commonwealth Edison Company requesting necessary comments for environmental consideration concerning the maintenance dredging of approximately 750 cubi yards of material at the forebay of the Quad Cities Generating Station, at Mississippi River mile 506.7 near Cordova. We offer the following comments.

Based on the information included in this submittal, it is our engineering judgment that the proposed project may be completed without causing water pollution as defined in the Illinois Environmental Protection Act, provided the project is carefully planned and supervised.

These comments are directed at the effect on water quality of the construction procedures involved on the above described project and is not an approval of any discharge resulting from the completed facility, nor an approval of the design of the facility. These comments do not supplant any permit responsibilities of the applicant toward the Agency.

This Agency hereby issues certification under Section 401 of the Clean Water Act (PL 95-217), subject to the applicant's compliance with the following conditions:

1. The applicant shall not cause:
 - a. violation of applicable water quality standards of the Illinois Pollution Control Board, Title 35, Subtitle C: Water Pollution Rules and Regulation;
 - b. water pollution defined and prohibited by the Illinois Environmental Protection Act; and
 - c. interference with water use practices near public recreation areas or water supply intakes.
2. The applicant shall provide adequate planning and supervision during the project construction period for implementing construction methods, processes and cleanup procedures necessary to prevent water pollution and control erosion.
3. Any spoil material excavated, dredged or otherwise produced must not be returned to the waterway but must be deposited in a self-contained area in compliance with all state statutes, regulations and permit requirements with no discharge to waters of the State unless a permit has been issued by this Agency. Any backfilling must be done with clean material and placed in a manner to prevent violation of applicable water quality standards.

4. All areas affected by construction shall be mulched and seeded as soon after construction as possible. The applicant shall undertake necessary measures and procedures to reduce erosion during construction. Interim measures to prevent erosion during construction shall be taken and may include the installation of staked straw bales, sedimentation basins and temporary mulching. All construction within the waterway shall be conducted during zero or low flow conditions. The applicant shall be responsible for obtaining an NPDES Storm Water Permit prior to initiating construction if the construction activity associated with the project will result in the disturbance of 5 (five) or more acres, total land area. An NPDES Storm Water Permit may be obtained by submitting a properly completed Notice of Intent (NOI) form by certified mail to the Agency's Division of Water Pollution Control, Permit Section.

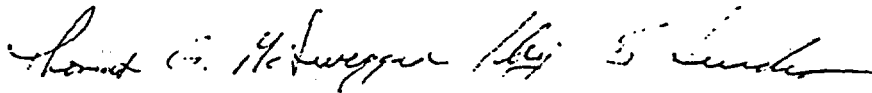

5. The applicant shall implement erosion control measures consistent with the "Standards and Specifications for Soil Erosion and Sediment Control" (IEPA/WPC/87-012).

6. The applicant shall comply with the permit 1992-EA-0174 issued March 25, 1992 for the disposal facilities for the dredged material.

This certification becomes effective when the Department of the Army, Corps of Engineers, includes the above condition #1 through 6 as conditions of the requested permit issued pursuant to Section 404 of PL 95-217.

This certification does not grant immunity from any enforcement action found necessary by this Agency to meet its responsibilities in prevention, abatement, and control of water pollution.

Very truly yours,

Thomas G. McSwiggin, P. E.

Gentlemen:

Thank you for your submittal of an application for the subject project. From a review of the information submitted it appears that the project qualifies for approval under Department of Transportation, Division of Water Resources Statewide Permit No. 11. Please review the enclosed copy of this permit to determine whether your work will meet its terms and conditions. If any of the conditions would not be met, please advise us of the differences and we will continue processing your application. If we do not hear from you within thirty (30) days, we will assume it is your intention to comply with the conditions of Statewide Permit No. 11.

This letter should not be construed as a release from any other federal, state or local requirements.

Please feel free to contact Mike Diedrichsen of my staff at 217/782-3863 if you have any questions or comments.

Sincerely,

Dennis L. Kennedy, P.E.

MEMORANDUM FOR DISTRIBUTION

SUBJECT: STATEWIDE PERMIT NO. 11 - MINOR
MAINTENANCE DREDGING ACTIVITIES

Attached for your information is a copy of Illinois Department of Transportation, Division of Water Resources Statewide Permit No. 11, which has been issued to authorize minor maintenance dredging activities on all rivers, lakes and streams under the Department's jurisdiction except those in Lake, McHenry, Cook, DuPage, Kane and Will Counties for which regulatory floodways have been designated pursuant to Illinois Administrative Code 708. This permit has been issued pursuant to the Rivers, Lakes and Streams Act, 615 ILCS 5 (1992 State Bar Edition).

This Act requires the Department to regulate construction within public bodies of water and within the floodways of streams draining ten (10) square miles or more in rural areas and one (1) square mile or more in urban areas. Among the purposes of the regulatory program are the protection of public interests in public bodies of water, the preservation of the significant increases in potential flood damage. The issuance of Statewide Permit No. 11 represents, in part, the Department's ongoing effort to accomplish these purposes while reducing regulatory costs and burden on the public.

For additional information regarding this permit, or any other aspect of the Division of Water Resources' regulatory program, please feel free to contact the Northern Technical Analysis and Regulatory Unit in Schaumburg (708/705-4341) or the Technical Analysis and Permit Unit in Springfield (217/782-3862).

ILLINOIS DEPARTMENT OF TRANSPORTATION
DIVISION OF WATER RESOURCES
3215 EXECUTIVE PARK DRIVE
SPRINGFIELD, ILLINOIS 62794-9484

STATEWIDE PERMIT NO. 11

AUTHORIZING MINOR MAINTENANCE
DREDGING ACTIVITIES

PURPOSE

The purpose of this Statewide Permit is to authorize minor maintenance dredging activities which have insignificant impact on those factors under the jurisdiction of the Illinois Department of Transportation, Division of Water Resources (IDOT/DWR). It is no longer necessary to submit applications to, or obtain individual permits from, IDOT/DWR for activities meeting the terms and conditions of this permit. If a project would not meet all of the terms and conditions of this permit, a formal permit application must be submitted.

APPLICABILITY

This permit applies to minor maintenance dredging activities (see special conditions) on all Illinois streams under the Department's jurisdiction except those in Lake, McHenry, Cook, DuPage, Kane and Will Counties for which regulatory floodways have been designated pursuant to 92 Illinois Administrative Code 708. The permit also applies to maintenance dredging activities of active harbors, marinas, and docking and water intake facilities on all Illinois rivers and lakes under the Department's jurisdiction except those in Lake, McHenry, Cook, DuPage, Kane and Will Counties for which regulatory floodways have been designated pursuant to 92 Illinois Administrative Code 708. The permit does not authorize any other type of instream work such as paving or enclosing a channel. Nor does the permit apply to any project which would conflict with any federal, state, or local project or improvement or with any other rule of the Department.

COORDINATION WITH OTHER AGENCIES

This permit does not supersede nor relieve any permittee's responsibility to obtain other federal, state or local permits. The local (county or municipal) regulatory official and the U. S. Army Corps of Engineers' regulatory functions office should be contacted to obtain any required permits. In addition, if any historical or archeological materials are revealed by any activity performed under this permit, the activity shall be suspended and the permittee shall notify the staff archeologist, Historic Preservation Agency, One Old State Capitol Plaza, Springfield, Illinois 62701.

SPECIAL CONDITIONS

In order to be authorized by this permit, a project must meet the following special conditions:

1. In the case of minor maintenance dredging of a stream channel:
 - a. The affected length of the stream shall not, either singularly or cumulatively, exceed one thousand (1000) feet;
 - b. The project shall not include the construction of any new channel; all work must be confined to the existing channel or to reestablishing flows in the natural stream channel; and
 - c. The cross-sectional area of the dredged channel shall conform to that of the natural channel upstream and downstream of the site.
2. Dredged or spoil material shall not be disposed of in a wetland and shall be either:
 - a. Removed from the floodway;
 - b. Used to stabilize an existing bank provided no materials would be placed higher than the existing top of bank and provided the cross-sectional area of the natural channel would not be reduced by more than ten percent (10%) nor the volume of material placed exceed two (2) cubic yards per lineal foot of streambank;
 - c. Used to fill in an existing washed out or scoured floodplain area such that the average natural floodplain elevation is not increased;
 - d. Used to stabilize an existing levee provided the height of the levee would not be increased nor its alignment changed;
 - e. Placed in a disposal site previously approved by the Department in accordance with the conditions of the approval; or

- f. Used for beach nourishment, provided the material meets all applicable water quality standards.
3. Disturbance of streamside vegetation shall be kept to a minimum during construction to prevent erosion and sedimentation. All disturbed floodway areas, including the stream banks, shall be seeded or otherwise stabilized upon completion of construction.

GENERAL CONDITIONS

1. This permit is granted in accordance with the Rivers, Lakes and Streams Act, 615 ILCS 5 (1992 State Bar Edition).
2. This permit does not convey title to any permittee or recognize title of any permittee to any submerged or other lands, and furthermore, does not convey, lease or provide any right or rights of occupancy or use of the public or private property on which the project or any part thereof will be located, or otherwise grant to any permittee any right or interest in or to the property, whether the property is owned or possessed by the State of Illinois or by any private or public party or parties.
3. This permit does not release any permittee from liability for damage to persons or property resulting from any activity covered by this permit and does not authorize any injury to private property or invasion of private rights.
4. This permit does not relieve any permittee of the responsibility to obtain other federal, state or local authorizations required for the construction of the permitted activity; and if any permittee is required by law to obtain approval from any federal or other state agency to do the work, authorization granted by this permit is not effective until the federal and state approvals are obtained.
5. If the activity authorized by this permit is located in or along a meandered lake, the permittee and the permittee's successors shall make no claim whatsoever to any interest in any accretions caused by the activity.

6. This Statewide Permit shall remain in effect until such time as it is modified, suspended, or revoked by the Department of Transportation.

This Statewide Permit was issued on December 1, 1988 and last modified or corrected November 22, 1993.

ILLINOIS ENVIRONMENTAL PROTECTION AGENCY
WATER POLLUTION CONTROL PERMIT

LOG NUMBERS: 5001-01

PERMIT NO.: 2002-EA-5001

FINAL PLANS, SPECIFICATIONS, APPLICATION
AND SUPPORTING DOCUMENTS

DATE ISSUED: January 17, 2002

PREPARED BY: Exelon Generation Company L.L.C.

SUBJECT: Exelon Generation Company L.L.C. -- Quad Cities Dredged Material Sedimentation Ponds

PERMITTEE TO CONSTRUCT, OWN AND/OR OPERATE

Exelon Generation Company L.L.C.
4300 Winfield Road
Warrenville, IL 60555

Permit is hereby granted to the above designated permittee(s) to construct, own and/or operate the water pollution control facilities described as follows:

The facilities consist of two earthen lagoons, each having an approximate volume of 36,040 cubic yards, connected by a concrete weir. The lagoons will be used to settle material dredged from the intake channel at the power plant, and will not discharge to waters of the State.

This operating permit expires on December 31, 2006.

This permit renews and replaces Permit Number 1997-EA-3026 which was previously issued for the herein permitted facilities.

This permit is issued subject to the following Special Condition(s). If such Special Condition(s) require(s) additional or revised facilities, satisfactory engineering plan documents must be submitted to this Agency for review and approval for issuance of a Supplemental Permit.

SPECIAL CONDITION 1: There shall be no discharge of wastewater from these facilities to waters of the State.

SPECIAL CONDITION 2: The permittee shall have the facility inspected by a registered engineer to assess for damage and necessary repairs if dredged material is removed to allow for further disposal operations. The report of the engineer shall be filed with the Agency, and any repairs shall be permitted under supplemental permit, as required.

THE STANDARD CONDITIONS OF ISSUANCE INDICATED ON THE REVERSE SIDE MUST BE COMPLIED WITH IN FULL. READ ALL CONDITIONS CAREFULLY.

**READ ALL CONDITIONS CAREFULLY:
STANDARD CONDITIONS**

The Illinois Environmental Protection Act (Illinois Revised Statutes Chapter 111-12, Section 1039) grants the Environmental Protection Agency authority to impose conditions on permits which it issues.

1. Unless the construction for which this permit is issued has been completed, this permit will expire (1) two years after the date of issuance for permits to construct sewers or wastewater sources or (2) three years after the date of issuance for permits to construct treatment works or pretreatment works.
2. The construction or development of facilities covered by this permit shall be done in compliance with applicable provisions of Federal laws and regulations, the Illinois Environmental Protection Act, and Rules and Regulations adopted by the Illinois Pollution Control Board.
3. There shall be no deviations from the approved plans and specifications unless a written request for modification of the project, along with plans and specifications as required, shall have been submitted to the Agency and a supplemental written permit issued.
4. The permittee shall allow any agent duly authorized by the Agency upon the presentations of credentials:
 - a. to enter at reasonable times, the permittee's premises where actual or potential effluent, emission or noise sources are located or where any activity is to be conducted pursuant to this permit;
 - b. to have access to and copy at reasonable times any records required to be kept under the terms and conditions of this permit;
 - c. to inspect at reasonable times, including during any hours of operation of equipment constructed or operated under this permit, such equipment or monitoring methodology or equipment required to be kept, used, operated, calibrated and maintained under this permit;
 - d. to obtain and remove at reasonable times samples of any discharge or emission of pollutants;
 - e. to enter at reasonable times and utilize any photographic, recording, testing, monitoring or other equipment for the purpose of preserving, testing, monitoring, or recording any activity, discharge, or emission authorized by this permit.
5. The issuance of this permit:
 - a. shall not be considered as in any manner affecting the title of the premises upon which the permitted facilities are to be located;
 - b. does not release the permittee from any liability for damage to person or property caused by or resulting from the construction, maintenance, or operation of the proposed facilities;
 - c. does not release the permittee from compliance with other applicable statutes and regulations of the United States, of the State of Illinois, or with applicable local laws, ordinances and regulations;
 - d. does not take into consideration or attest to the structural stability of any units or parts of the project;
 - e. in no manner implies or suggests that the Agency (or its officers, agents or employees) assumes any liability, directly or indirectly, for any loss due to damage, installation, maintenance, or operation of the proposed equipment or facility.
6. Unless a joint construction/operation permit has been issued, a permit for operating shall be obtained from the agency before the facility or equipment covered by this permit is placed into operation.
7. These standard conditions shall prevail unless modified by special conditions.
8. The Agency may file a complaint with the Board for suspension or revocation of a permit:
 - a. upon discovery that the permit application contained misrepresentations, misinformation or false statement or that all relevant facts were not disclosed; or
 - b. upon finding that any standard or special conditions have been violated; or
 - c. upon any violation of the Environmental Protection Act or any Rules or Regulation effective thereunder as a result of the construction or development authorized by this permit.
