## 1.0 SCOPE

This limited scope audit, by a team of auditors from the Yucca Mountain Quality Assurance Division (YMQAD), will evaluate the U.S. Geological Survey (USGS) Quality Assurance (QA) Program to determine whether it meets the requirements and commitments imposed by the Office of Civilian Radioactive Waste Management. This will be done by verifying implementation and effectiveness of the system in place, as well as verifying compliance with requirements.

In addition to the follow-up on open Corrective Action Requests (CARs), a representative sample of discrepancies identified during previous QA audits and surveillances of USGS will be included in the scope of this audit to determine the effectiveness of USGS corrective actions.

The programmatic elements to be audited, as well as those programmatic elements not included in this audit, are identified in Section 4.0 of this plan.
