LICENSE APPLICATION**

ITEM 10

Radiation Safety Program

ATTACHMENT 10.6

Ordering and Receiving

A. Ordering of Radioactive Materials

- 1. The Nuclear Medicine Technologist will place all orders for radioactive material and will ensure that the requested materials and quantities are authorized by the license and that possession limits are not exceeded (see NRC and State licenses).**
- 2. Written records that identify the authorized user, radionuclide, chemical form, activity, and supplier will be made.**
- 3. The above records will be checked to confirm that material received was ordered through proper channels.**

B. Receiving Radioactive Material

- 1. The radioactive material will be delivered to the hot lab by the radiopharmaceutical company during times when nuclear medicine personnel are not present. Otherwise, it will be delivered directly to the technologist.**
- 2. The nuclear medicine technologist will sign for the delivery of the package(s).**
