Sealed source/device registration of smoke detector/door closer device

SUMMARY:

In response to Mr. Johnson's letter dated April 17, 2003, Bruce Carrico and I called him and discussed the registration process with him. He was interested in registering a device that uses a smoke detector to activate a door-closing device in case of a fire. We described the regulatory requirements and the application process for an exempt distribution license, for the registration of the device, and for the Agreement State possession license. We directed him to the applicable guidance documents (i.e. NUREG-1556, Vols. 3 and 8).
