Document_Title: NUREG-1768, United States Nuclear Regulatory Commission Package Performance
Nuclear Test Protocols.

Comments: I am a concerned citizen (who votes) and the question in my mind is HOW SAFE WILL
NUCLEAR TRANSPORTATION CONTAINERS BE? You should use real containers with similar contents
and test them in EVERY Way they could possibly be abused. Blow them up. Terrorists will try this, you
should too. I don't want nuclear infectious waste spewing into pristine desert environments in the
transportation process to a plant that can't possibly be totally safe. It's even a stretch to say it's a good
place. Yucca Mountain is not just a place to dig a hole for our trash. The system needs to change to
eliminate the waste. WORK ON IT!!

Yours Truly,
Karl Welter
