### JAN 1 9 1994

Robert F. Pritchett Technical Project Officer for Yucca Mountain Site Characterization Project Reynolds Electrical & Engineering Co., Inc. P.O. Box 98521 Las Vegas, NV 89193-8521

EVALUATION OF AMENDED RESPONSE TO CORRECTIVE ACTION REQUEST (CAR) YM-93-058 RESULTING FROM YUCCA MOUNTAIN OUALITY ASSURANCE DIVISION (YMOAD) AUDIT YMP-93-12 OF REYNOLDS ELECTRICAL & ENGINEERING CO., INC. (SCP: N/A)

The YMQAD staff has evaluated the amended response to CAR YM-93-058. amended response has been determined to be satisfactory. Verification of completion of the corrective action will be performed after the effective date provided. Any extension to this date must be requested in writing, with appropriate justification, prior to the date. Please send a copy of extension requests to Nita J. Brogan, YMQAD/QATSS, 101 Convention Center Drive, Suite 640, Las Vegas, Nevada 89109.

If you have any questions, please contact either Robert B. Constable at 794-7945 or Stephen R. Dana at 794-7176.

# CORRECTIVE ACTION REQUEST (Continuation Page)

AMENDED CORRECTIVE ACTION RESPONSE for CAR # <u>YM-93-058</u>

A. Remedial Action:

ł

A starter tunnel "check survey" has been performed by Raytheon Services Nevada (RSN) to ensure that line, grade, and nominal size at "B line" are correct. Although the "check survey" report has not been issued, no deficiencies have been reported.

> <u>Responsible Individual: T. M. Leonard</u> <u>Estimated completion date: August 30, 1993</u>

B. Investigative Action:

Extent of Deficiency: The quality affecting survey work performed by REECo Engineering applies only to the establishment of line, grade, and nominal size within the starter tunnel.

Responsible Individual: T. M. Leonard Estimated completion date: Completed

C. Root Cause Determination:

The intent of the REECo Quality Assurance Program Plan was misinterpreted. Surveying of line and grade (for marking the drill face center line and grade) is shot from control points set by a QA qualified organization (RSN). Our interpretation that surveying line, grade and nominal size was not a QA activity was deemed incorrect.

D. Corrective Action to Preclude Recurrence:

The REECo matrixed surveyors, supervision, and party chief will be qualified to perform quality affecting survey work in accordance with the YMP QA program.

The instruments (total station and level) will be calibrated at a QA qualified calibration facility at an interval established by the manufacturer.

### DEPARTMENT OF ENERGY

Office of Civilian Radioactive Waste Management Office of Geologic Disposal Yucca Mountain Site Characterization Project Office P.O. Box 98608 Las Vegas, NV 89193-8608 DEC 1 4 1993

WBS 1.2.11

OA: N/A

Robert F. Pritchett Technical Project Officer for Yucca Mountain Site Characterization Project Reynolds Electrical & Engineering Co., Inc. P.O. Box 98521 Las Vegas, NV 89193-8521

EVALUATION OF RESPONSE TO CORRECTIVE ACTION REQUEST (CAR) YM-93-058 RESULTING FROM YUCCA MOUNTAIN QUALITY ASSURANCE DIVISION (YMQAD) AUDIT YMP-93-12 OF REYNOLDS ELECTRICAL & ENGINEERING CO., INC. (REECo) (SCP: N/A)

Reference: Ltr, Pritchett to Spence, dtd 10/28/93

The YMOAD staff has evaluated the response to CAR YM-93-058 and REECo's "Calibration Requirements for Survey Equipment" detailed in the referenced letter. The response has been determined to be unsatisfactory for the following reasons:

The YMOAD does not agree that survey instruments are a "Commercial Device," as stated in Quality Assurance Requirements and Description DOE/RW-0333P, Section 12.2.5. Therefore, the requirements of DOE/RW-0333P, Section 12, do apply for control, calibration, and maintenance of survey instruments.

Based on a meeting held November 18, 1993, between YMQAD, REECo, Raytheon Services Nevada, and the Civilian Radioactive Waste Management System Management and Operating Contractor (CRWMS M&O), those in attendance generally agreed that specific criteria should be established to address calibration of survey instruments used for location determination of quality-affecting items. In order to ensure that the REECo survey program meets the intent of DOE/RW-0333P, Section 12 requirements, YMQAD requests that REECo address the following actions, promulgated during the November 18 meeting:

- 1. Using a permanent baseline of survey monuments traceable to a national standard, REECo shall provide field calibration (verification) of survey instruments. If no nationally recognized standard exists, the basis for calibration shall be documented.
- 2. REECo, working with CRWMS M&O, shall investigate and define survey tolerances based on 1 above and actual field construction needs.
- 3. REECo shall establish maintenance of survey instruments based on 1 above and preestablished intervals.

Note: Since this activity is not a calibration, the requirements stated in DOE/RW-0333P, Section 7.2.6, are not required to assess the vendors capability of providing a calibration service for survey instruments.

4. All actions associated with Items 1 through 3 above shall be described in an implementing document.

Robert F. Pritchett

Until the above actions are resolved, REECo shall not perform any survey activities associated with location determination of quality-affecting items. In addition, YMQAD requests REECo to determine if additional surveying was performed by REECo of quality-affecting items, subsequent to initiation of CAR YM-93-058. If additional surveying was performed, describe what actions have been taken to assure that no additional deficiencies exist.

An amended response is required to be submitted to this office within ten working days of the date of this letter. Send the original of your response to Nita J. Brogan, YMQAD/QATSS, 101 Convention Center Drive, Suite 640, Las Vegas, Nevada 89109. If an extension to the due date is necessary, it must be requested in writing, with appropriate justification, prior to that date.

If you have any questions, please contact either Robert B. Constable at 794-7945 or Stephen R. Dana at 794-7176.

R.C. Spince

|------|--|
|      | CORRECTIVE ACTION REQUEST (Continuation Page)  |
| AMEN | DED CORRECTIVE ACTION RESPONSE for CAR <u>YM-93-058</u>  |
| D.   | Corrective Action to Preclude Recurrence:  |
|      | It was erroneously reported in the 10/29/93 Amended Response that the<br>REECo matrixed personnel had been qualified in accordance with program<br>requirements. As a result, REECo CAR # CA-94-003 and a stop work notice<br>was issued to preclude further quality affecting survey activities. As of<br>12/22/93 all survey personnel were qualified to perform quality affecting<br>activities. The completion of this action was independently verified by<br>REECo Quality Assurance.  |
|      | Technical Control procedure, TC-581-SP-0006, has been written, reviewed,<br>approved and issued for conducting Survey Instrument Repeatability Tests.<br>The procedure confirms the proper operation of the survey equipment to<br>adequately repeat measurements against known reference points. The survey<br>instruments will be field checked against the survey monuments that are<br>traceable nationally recognized standards in Kingman, Arizona on 12/29/93.<br>Requirements for periodic maintenance checks will be added to the<br>procedure by 01/28/94. |
|      | Survey activities were conducted subsequent to the initiation of this CAR<br>Another check survey of the Starter Tunnel was requested (Work Request No<br>94073) to be performed by RSN Survey to assure that no additiona<br>deficiencies exist. A followup response will be provided by January 28<br>1994 to indicate the status and results of the check survey.   |
|      | The tolerance requirement specified in TC-581-SP-0006 will be reviewed<br>with the CRWMS M&O to determine the acceptability of the field<br>verification method for all anticipated uses of the survey equipment,<br>without the specification of specific survey tolerances. If the CRWMS M&O<br>agrees with the functional check requirements, then the tolerances giver<br>on drawings will be applicable to accuracies required of survey equipment.<br>REECo will provide an update on the status of this review by January 28,<br>1994.                        |
|      | <u>Responsible Individuals: T. M. Leonard/W. J. Glasser</u><br><u>Estimated completion date: January 28, 1994</u>  |
