VERIFICATION OF CORRECTIVE ACTION AND CLOSURE OF CORRECTIVE ACTION REQUEST (CAR) YM-91-052 RESULTING FROM YUCCA MOUNTAIN QUALITY ASSURANCE DIVISION (YMQAD) AUDIT YMP-91-05 OF U.S. GEOLOGICAL SURVEY

The YMQAD staff has verified the corrective action to CAR YM-91-052 and determined the results to be satisfactory. As a result, the CAR is considered closed.

If you have any questions, please contact either Catherine E. Hampton at 794-7973 or John S. Martin at 794-7881.

CORRECTIVE ACTION REQUEST (continuation sheet)

CORRECTIVE	ACTION	DECDONCE.
LUKKELIIVE	ALIUN	RESPUNSE:

- 1. CORRECTIVE ACTION FOR DEFICIENT CONDITION (CAR YM-91-52)
 - A. Extent of Deficiency: The YMP-USGS Records Coordinator is reviewing QMP-17.01 R4, including all outstanding modifications, against the requirements in the YMP-USGS QA Program Plan, QAPP-01, R5, including changes proposed for Section 17 in the interim change notice referred to in Item C below. The results of this review will be outlined in a supplemental response by 8-1-91.
 - B. Root Cause: Oversight. The temporary records storage requirements in paragraph C.2.2.1 of the Records Management Plan (RMP) R2, were referred to when Modification No. 4 for QMP-17.01, R4, was prepared. The more stringent requirements for one-of-a-kind records from paragraph C.2.2.2 of the RMP and QAPP-01, R5 were inadvertently missed.

If another cause is indicated by the investigation, the results will be outlined in the 8-1-91 supplemental response.

C. <u>Remedial Action:</u> The YMP-USGS Records Coordinator has prepared an Interim Change Notice (ICN) for Section 17 of QAPP-01, R5. This ICN will provide the appropriate quality assurance requirements based upon the OCRWM QA Requirements Document (QARD). Anticipated approval is 8-1-91.

If the investigation reveals other discrepancies between the upper-tier documents and the implementing instruction, then appropriate actions will be taken and the results will be outlined in the 8-1-91 supplemental response.

D. <u>Corrective Action to Prevent Recurrence</u>: By completing the investigative and remedial actions, the Records Coordinator will have gained more knowledge of the hierarchy of YMP-USGS quality assurance requirements, and will have completed a comprehensive review to assure consistency between the program requirements and the implementing instructions. No additional actions are warranted at this time. If the investigation indicates that additional actions are warranted, the preventive measures will be outlined in the 8-1-91 supplemental response.

CORRECTIVE ACTION REQUEST (continuation sheet)

1. SUPPLEMENTAL RESPONSE FOR DEFICIENT CONDITION NOTED IN CORRECTIVE ACTION REQUEST NO. CAR YM-91-52

The following information is provided to supplement the 6/28/91 response.

- A. Extent of Deficiency: As outlined in the 6/28/91 response, the YMP-USGS Records Coordinator completed the review of implementing instructions and upper-tier requirements concerning records management requirements. No additional significant discrepancies were noted during this review. The OCRWM Quality Assurance Requirements Document (QARD) Revision 4 states that the requirements of NQA-1-1989 will be followed. NQA-1 provides for one-hour fire-rated containers to be used for the temporary storage of records, however YMP-USGS-QAPP-01 R5 currently does not distinguish unique requirements for the temporary storage of records. YMP-USGS-QMP-17.01 R4 included the NQA-1 requirement for the temporary storage of records. Modification 2 for YMP-USGS-QMP-17.01 R4 had been issued to clarify the use of UL-one-hour fire-rated-containers for the "temporary" storage of one-of-a-kind records during processing, review, or use. The QMP states that the LRC will use an approved "single storage facility" to provide storage (other than temporary) for one-of-a-kind items.
- B. Root Cause: The investigation revealed that the requirements for the "temporary storage" of records stemming from the Records Management Plan (RMP) Revision 2 and from the OCRWM QARD (NQA-1-1989) were different than those defined in the YMP-USGS-QAPP-01 R5. The requirements in the QAPP focused on those for single storage facilities, alternate single storage facilities and for the dual storage of records; and the QAPP required that the "temporary storage" for one-of-a-kind items meet the same requirements as those for single-storage facilities. Because the majority of records for the YMP-USGS are stored in "dual facilities", the QAPP requirements pertaining to one-of-a-kind items were inadvertently missed when the QMP-17.01 was modified.
- C. Remedial Action: The YMP-USGS Records Coordinator prepared an Interim Change Notice (ICN) for Section 17 of QAPP-01, R5. This ICN will clarify the YMP-USGS requirements concerning single storage, dual storage and temporary storage of records. It is anticipated that the ICN will be approved and issued by 8/30/91.

The actual storage conditions being implemented by the LRC personnel meet the requirements of the QARD (NQA-1-1989) and the proposed QAPP-01 R5 ICN, therefore, there has been no adverse impact.

CORRECTIVE ACTION REQUEST (continuation sheet)

D. <u>Corrective Action to Prevent Recurrence:</u> By completing the investigative and remedial actions, the Records Coordinator has gained more knowledge of the hierarchy of YMP-USGS quality assurance requirements, and completed a comprehensive review to assure consistency between the program requirements and the implementing instructions. The investigation did not indicate that additional actions are warranted.

VERIFICATION OF CORRECTIVE ACTION FOR CAR YM-91-52

Verification of corrective action for subject CAR was accomplished to ensure that committed actions had been satisfactorily completed. In the accepted USGS response, USGS was to revise their QAPP Section #17 to allow the use of temporary storage of records at their LRC (i.e.; the utilization of a one hour fire rated safe in accordance with NQA-1). Review of ICN #6 to the USGS QAPP provides for the utilization of temporary storage of records at the USGS LRC. In addition, it was noted that the Records Coordinator performed a review of upper tier requirements to verify that these criteria had been appropriately transcribed into lower tier documents. During this review, it was noted, that no other discrepancies were found. The results of this review coincide with the results of the review that was performed by this auditor as a result of Audit No. YMP-91-05.

Based upon the above corrective actions, no further action is deemed necessary at this time and this CAR is considered closed.

John S. Martin
